The Lady From Burke

MOST North Carolina newspaper folks would like to be citizens of Burke county when the June primary date rolls around in order to cast their ballots for Miss Beatrice Cobb, who has announced her intention of making the race for the state senate from the 28th district, which consists of the counties of Burke, Caldwell and Alexander.

Miss Cobb has never before sought public office, although she has taken an active interest in politics for many years.

She has been a member of the state Democratic committee, and for two years has been national committee woman from North Carolina. She has been editor and owner of The Morganton News-Herald, one of the most prosperous and influential papers of the state, for many years, and since 1921 has been secretary of the North Carolina Press association.

She has the best wishes of the press gang throughout the state.

A Good Time to Build Homes

UNDER the new federal housing act, which is now in effect, it is much easier for a family of moderate means to own a home than it has ever been in times past.

The new act provides for low interest rates, long terms and small installments, and was passed to stimulate building and relieve the housing shortage which has become a serious problem in all parts of the country.

The government does not lend the money direct, but guarantees building loans made by banks, insurance companies and other agencies which are looking for safe investment of reserve funds.

A down payment of only 10 per cent is required under this act, and the building lot will be accepted at appraised value on the down payment.

The authorities of the housing administration are making a great drive to encourage applications for loans for new construction and repairs, and it looks as though Mr. Average Man now has an opportunity to own a home of his own.

Building and loan associations everywhere have also been spurred to action by the efforts of the government, and are offering more liberal terms to prospective home builders.

It would appear that this new housing measure should have a particular significance in Franklin.

A summer resort town with few equals, it has been handicapped for years because of lack of facilities for the housing of those who wish to spend the hot weather in this section.

And, again, Franklin is headquarters for the Nantahala forest personnel, and these men and their families are of the highest type and are accustomed to modern accommodations. They are liable to be transferred at any time, and are, therefore, unable to build homes of their own. They are willing and able to pay for those things which are considered in many places as mere commonplace conveniences. But frequently they cannot get them here, and are compelled to put up with anything that happens to be available.

Small, modern cottages of from three to six rooms, can be built now at a cost which will enable the individual or company building them to realize a splendid return on the investment, besides carrying the installments under the new housing legislation.

At least 50 of these cottages could be rented in Franklin—most of them to desirable tenants the year round—and all of them at good prices during the summer season.

At the present time no agency has been announced in Maçon county where the federal housing loans may be secured, but there are a number of banks and insurance agencies in Asheville, which cover Western North Carolina, and have been advertising for applications.

It is a good time to build—either for a home or for an investment.

Political Announcements
