BE SURE TO GET AN

Ingersoll

AMERICA'S
STANDARD TIME!

Get trustworthy time in a smart Ingersoll watch. Yankee is the smallest and thinnest pocket watch at \$1.50. Chrome-plated case, clear numerals, unbreakable crystal.

The worst
BODY ODOR
is
P.O.

The worst body odor comes from P.O.—perspiration odor under the arms.

Take 1 minute to use Yodora—new, amazing deodorant cream that works directly on underarm excretions. Normally stops odor 1 to 3 days. Yodora also reduces amount of perspiration.

Made without lard—Yodora is utterly different from stiff, grainy pastes: (1) Soft—smooth as face cream. (2) Leaves no sticky film on fingers or underarms. (3) Leaves no "lardy" smell on clothes. 25¢—50¢. Get it today—money back if not delighted. Trial size free. Send coupon.

YODORA

DEODORANT CREAM

FREE! Send coupon for trial size to McKesson & Robbins, Fairfield, Conn. Dept. F-1.

Beauticians Must Take Wasserman Test

RALEIGH, July 6.—All new applicants for licenses to work as beauticians who file for the examination to be held in October, this year, must present certificates showing they have taken the Wasserman blood test, it was announced following a conference between representatives of the North Carolina board of cosmetic art examiners and officials of the state board of health, which, under the law, must approve rules of sanitation and health in beauty shops and among the personnel.

Where such tests are positive, the board of examiners may, in its discretion, before issuing a license to practice cosmetic arts, give special consideration to the applicant by requiring treatment until they become non-infectious and, finally, cured. The board also has the right to require individuals to have blood tests made between examinations, whenever it is deemed expedient for the protection of the public and the information of the beautician.

It was also announced that before any worker can have their license renewed on June 30, 1939, they must take the test, thus making the rule, which will be strictly enforced, applicable to those already engaged in work, as well as those who in the future make application for licenses. The personnel of beauty shops now doing business in North Carolina numbers approximately 5,000.

The purpose of the Wassermann test requirement is not only to protect the public but also for the protection of the workers, as well, it was explained following the conference. This forward attitude on the part of the board of cosmetic arts examiners is in line with the program for the control of venereal diseases being conducted by the state board of health.

The present board members are: Mrs. Annie L. Williamson, of Fayetteville, chairman; Mrs. Gertrude Hutchinson, of Durham, secretary, and Mrs. Ethel Sinclair, of Hickory.

Employers Should Learn Numbers of Employees

Macon county employers hiring workers, now, because of seasonal business should learn the account number of each new employee and enter it in permanent records. New workers without account numbers should be referred by employers to the Asheville Social Security Board office, where numbers will be assigned them. This reminder, which comes today from the Social Security Board, is directed especially toward employers who, during the summer months, take on extra employees at hotels, tourist homes, and camps, or in such industries as ice cream, canning, lumber mill-work, cement, automobile tires, and laundry.

Attention is called to the fact that quarterly wage reports are submitted by employers to the Bureau of Internal Revenue for all employees whose wages are for employment covered by Title VIII of the Social Security Act. The amount of taxable wages paid to temporary and part-time employees as well as to permanent workers must be reported, along with the name and account number of each employee. The employer's report of wages paid to an employee must include, in addition to wages in cash, the fair cash value of any other form of pay, such as goods, meals, or lodging.

Employers who are opening their businesses for the first time since the federal old-age insurance program went into effect on January 1, 1937, should make application at once for an employer's identification number at the nearest social security board office.

CARD OF THANKS

We wish to thank our many friends and kinsfolk for their kindness during the long sickness, and death of our dear old Grandmother, Aunt Betsy Jane Grant.

Especially do we thank our good neighbors of Bonny Crest who were so good to help us in every way.

For the flowers, we thank each giver, making such a beautiful floral offering possible; and too, we are not forgetting Mr. Bryant, the undertaker, and his helpers, who had charge of the funeral. We feel grateful to you all.

HARACE J. AND ELLA HURST AND FAMILY.

Father Howard V. Lane Transferred To Wilson

Members of the Catholic church in Franklin were extremely saddened when news came to them this past week that the Rev. Howard V. Lane, pastor, had been transferred to the church in Wilson, N. C., where he took up his new duties July 1 by order of the Most Rev. Eugene McGuinness, D. D., bishop of the North Carolina Catholic diocese. The name and character of Father Lane has been well known throughout Jackson and Macon counties not only for his true missionary spirit of being alert to all religious problems, but also for his activity in educational and social leadership.

It is expected that in the early Fall Father Lane will accept the call to join the North America Missionary Society with whom he will continue his missionary endeavors among all peoples of the United States, Canada, and eventually Mexico. His many friends in Western North Carolina wish him every success in his new and broader field of activity.

The Catholic Parish is being administered by the Rev. Cletus J. Helfrich until definite appointment is made by the Catholic Bishop of Raleigh.

State College Answers Timely Farm Questions

Q. What is meant by calcium-phosphorus ratio and what is this ratio for poultry?

A. This is the relative proportion of calcium and phosphorus in the poultry diet and the proper ratio is essential for bone development, egg shell, formation, and other body activities. If these minerals

are not present in the proper proportions, conditions such as slipped tendons may take place. In growing chicks the per cent of calcium and phosphorus in the feed should be 2.1 and 0.7 and for laying stock the percentage should be 1.6 of calcium and 1.0 of phosphorus.

Q. How do I make Bordeaux mixture for spraying my apple trees?

A. Three pounds of bluestone should be dissolved in a wooden

container for about 12 hours. This solution is then added to about 40 gallons of water and thoroughly mixed with four pounds of lime in the form of a paste. Enough water is then added to make 50 gallons of the solution. This is the standard 3-4-50 Bordeaux mixture. This solution is used to control codling moth, bitter rot, and fruit spot on apples. For late fruit, one pound of arsenate of lead should be added.
