

## Pisgah Forest Deer Hunt Set For Nov. 7 to Dec. 3

ASHEVILLE, N. C.—The Pisgah forest deer hunt, the fifth annual big game hunt to be held in the game preserve of the Pisgah national forest, will be held this year from November 7 to December 3, inclusive, according to the U. S. forest service and the North Carolina department of conservation and development. The entire 100,000 acres of the game preserve will be included in the hunt. It is estimated that at least 4,500 deer are now within the preserve as well as 150 black bears.

The hunt will be limited to 1,600 hunters, although it is expected that the number of applications will be more than this. Each hunt will be limited to three days and those who fail to get a deer or bear within that period will be out of the hunt.

The bag limit for the hunt is one deer of either sex or one bear, with the stipulation that if any hunter kills a bear he must pay an additional fee of \$10 before removing it from the game preserve.

Each participant in the hunt must pay a fee of \$7.50 to the U. S. forest service and also have a North Carolina hunting license. If a resident of North Carolina, the hunting license will cost \$2.10 and if a non-resident, the license will cost \$15.25. Most of the other states also charge \$15.25 for non-resident hunting licenses. These licenses may be obtained in advance for the hunt either from the game and inland fishing division of the department of conservation and development in Raleigh, from county or district game protectors or may be purchased at the checking stations within the Pisgah forest game preserve before the hunt starts.

Applications for participation in the hunt must be sent to the U. S. Forest Service, Atlanta, Ga., accompanied by a money order or cashier's check for \$7.50 made payable to the Regional Fiscal Agent, U. S. Forest Service. Checks of applicants whose names are not drawn for the hunt will be returned. All applications must reach the offices of the U. S. Forest Service in Atlanta before November 1. Formal application blanks and additional information concerning the hunt may be obtained from H. E. Ochsner, forest supervisor, Pisgah national forest, Arcade Building, Asheville, or from the Atlanta office.

The decision to hold this hunt again this fall and to permit the shooting of doe as well as buck and bear, was the result of careful investigation by both the U. S. forest service and the game and inland fishing division of the department of conservation and development extending over a period of years. The herd of some 4,500 deer now on the Pisgah game preserve is the result of diligent protection and careful management by the U. S. forest service. But recent surveys have shown that the game preserve is heavily overstocked and that the continued welfare of the herd demands continued reduction to prevent starvation and disease. Because the number of doe exceeds the number of buck, threatening to seriously upset the sex ratio, the department of conservation and development has again consented to the shooting of doe as well as buck.

Women will again be permitted to participate in the regular hunts, but will be excluded from the "wilderness hunt." A good many women have participated in previous hunts and several have bagged some of the biggest deer killed during the hunt. It is expected that the usual number of sportswomen will take part in this year's hunt.

In the forthcoming hunt, participants will be permitted to drive their own cars to their respective "compartments" or stands, thus facilitating the checking in and out of the hunters as well as the transportation of the game that is killed.

### Two Drugs Illegal Under Federal Act

Cinchopen and aminophyrine have been tagged by the food and drug administration as dangerous drugs when they are promiscuously distributed.

One section of the newly enacted food, drug, and cosmetic act holds a drug to be illegal if it is dangerous to health when used in the dosage, or with the frequency or duration, suggested in its labeling.

The food and drug administration has warned manufacturers and dealers that these two drugs when marketed in interstate commerce under labeling "which may result in their use by the general public" will be regarded as violating this provision of the law. This does not restrict use of the drug when prescribed by physicians.

Cinchopen has been widely used in treatment of arthritis, but the toxic effects have proved so serious that most physicians now refuse to use it.

Aminophyrine is a powerful pain killer but has an injurious effect on the blood and has been rejected by many physicians on this account. It has caused many deaths in the United States.

### INCOME DROPS

American farmers' cash income from marketings in August, including federal payments, totaled \$631,000,000, a drop of 19 per cent below the same month a year ago.

## Platform Built Especially for Kibitzers

Loyal members of the Amalgamated Order of Steamshovel Watchers, Des Moines Local 198, watch the excavations for the new home office of the Bankers Life company from a platform especially built for them after onlookers complained because the contractor had fenced in the excavation site. The platform is inside the fence and is protected from flying debris.

### Farmers Get Materials For Building Up Soils

North Carolina farmers, in carrying out soil-building practices under the 1938 farm program, have filed applications with the AAA for 1,020 tons of triple superphosphate, 3,399 tons of limestone, and 270,000 pounds of winter legume seed.

Under the conservation phase of the AAA program, the secretary of agriculture is authorized to promote soil conservation by making grants of aid to cooperating farmers, explained H. A. Patten, acting AAA executive officer at State college. The cost of the materials furnished will be deducted from payments which farmers would otherwise receive under the program.

The first material furnished farmers by the Triple-A was superphosphate in 1937. This year, limestone and legume seed have been added to the available materials. The value of materials that may be obtained by farmers in such cases is less than that part of the maximum payment for the farm to be earned by carrying out soil-building practices.

Three North Carolina counties, Haywood, Henderson, and Davidson, have received the AAA limestone. Ground agricultural limestone or its equivalent is applied as a neutralizer on acid soils in the East and South to promote the growth of desirable grasses and legumes.

The only winter legume seed distributed in the nation were made available in four North Carolina counties, the project being experimental in nature.

Bertie received 60,000 pounds of hairy vetch and 50,000 pounds of Austrian winter peas; Pender, 56,000 pounds of hairy vetch and 24,000 pounds of Austrian peas; Duplin, 28,000 pounds of the vetch and 12,000 pounds of Austrian peas; and Hertford 28,000 pounds of vetch and 40,000 pounds of winter peas.

### Regional Forester Says Fire Prevention Pays

The President's proclamation setting aside the week beginning October 9 as Fire Prevention Week is a timely reminder to every thoughtful citizen of the importance of preventing the needless waste occurring each year from forest fires.

Joseph C. Kircher, southern regional forester of the United States forest service, says that the prosperity of the south in the years ahead is vitally bound up with the conservation and wise use of her forest resources. With the expansion of timber using industries, Mr. Kircher states, it is necessary that everything possible be done to insure adequate permanent timber supplies. The first step in this direction is to stop the tremendous waste of present and potential timber by fire which kills and injures trees before they can serve a useful purpose.

Figures show that during the calendar year 1936 fires burned over 40 million acres of woodlands in the southern states from the Carolinas to Texas, resulting in an estimated total loss of about \$42,000,000, which does not include the tremendous intangible losses which always

follow forest fires. As a horrible indictment against man's carelessness and indifference, the records show that 90 per cent of all forest fires are man-caused. As evidence of the value of protection measures, less than two million acres of the entire 40 million burned over were in areas receiving organized protection.

State and federal foresters and other organized agencies are uniting in an effort to enlist the cooperation of all the people of the nation to prevent this wanton destruction of public wealth. The timber conserved through this plan is a contribution toward the establishment of permanent industries in the south. The commercial value of southern forests will increase steadily and every loyal citizen should do his utmost to prevent woods fires from any and every cause.

### HIGH MILK FLOW

Milk production for this time of the year is the largest on record but is declining seasonally, says John A. Arey, state college extension dairyman. Underlying factors are the abundant feed supplies at low prices when compared with butterfat prices.

Meetings have been held in Martin county by the farm and assistant agent to explain how growers can secure maximum payments under the agricultural conservation program.

### Watch Your Kidneys!

Help Them Cleanse the Blood of Harmful Body Waste

Your kidneys are constantly filtering waste matter from the blood stream. But kidneys sometimes lag in their work—do not act as Nature intended—fail to remove impurities that, if retained, may poison the system and upset the whole body machinery.

Symptoms may be nagging backache, persistent headache, attacks of dizziness, getting up nights, swelling, puffiness under the eyes—a feeling of nervous anxiety and loss of pep and strength. Other signs of kidney or bladder disorder may be burning, scanty or too frequent urination.

There should be no doubt that prompt treatment is wiser than neglect. Use Doan's Pills. Doan's have been winning new friends for more than forty years. They have a nation-wide reputation. Are recommended by grateful people the country over. Ask your neighbor!

**DOAN'S PILLS**

The worst BODY ODOR is P.O.

The worst body odor comes from P.O.—perspiration odor under the arms.

Take 1 minute to use Yodora—new, amazing deodorant cream that works directly on underarm excretions. Normally

stops odor 1 to 3 days. Yodora also reduces amount of perspiration.

Made without lard—Yodora is utterly different from stiff, grainy pastes: (1) Soft—smooth as face cream. (2) Leaves no sticky film on fingers or underarms. (3) Leaves no "lardy" smell on clothes. 25¢—50¢. Get it today—money back if not delighted. Trial size free. Send coupon.
