

North Carolina boasts of many edible wild plants, according to Dr. M. F. Buell, of the State college botany department. Among them are poke weed, spring cress, lamb's quarters, purslane, dandelion, and sea kale.

HELP KIDNEYS

To Get Rid of Acid and Poisonous Waste

Your kidneys help to keep you well by constantly filtering waste matter from the blood. If your kidneys get functionally disordered and fail to remove excess impurities, there may be poisoning of the whole system and body-wide distress.

Burning, scanty or too frequent urination may be a warning of some kidney or bladder disturbance.

You may suffer nagging backache, persistent headache, attacks of dizziness, getting up nights, swelling, puffiness under the eyes—feel weak, nervous, all played out.

In such cases it is better to rely on a medicine that has won country-wide acclaim than on something less favorably known. Use Doan's Pills. A multitude of grateful people recommend Doan's. Ask your neighbor.

EVER SINCE OUR BOSS FED US FUL-O-PEP THESE NESTS ARE ALWAYS OCCUPIED

AIN'T IT THE TRUTH! I HAVE TROUBLE EVERY DAY FINDING A NEST TO LAY MY EGG

Where Ful-O-Pep Egg Mash is fed the egg business is good every day. This mash contains the nutritious elements which laying hens require for increased production of big, sound shelled marketable eggs.

FUL-O-PEP EGG MASH

Keeps up body weight and decreases mortality in laying hens. If you want eggs and their quick cash returns feed Ful-O-Pep Egg Mash.

RECORDS MADE BY MACON BOYS

Agriculture Students At State College Made Fine Showing

Among the former members of the Future Farmer chapter of Franklin, who have made excellent records at N. C. State college, are James D. Patton, son of Representative Robert A. Patton, of Franklin, and Wayne L. Franklin, son of Mr. and Mrs. Jerry Franklin, of Franklin Route 4.

Patton was elected president of the '38 Student Agriculture fair, while Franklin was elected vice-president of the fair this year.

Paul J. Gibson, son of Mr. and Mrs. Walter Gibson, of Franklin Route 3, is now treasurer of the Alpha Beta, national honorary fraternity, and is also assistant business manager of the N. C. State agriculturist.

Robert Hurst is associate business manager of the N. C. State Agriculturist. He is the son of Mr. and Mrs. Horace Hurst, of Franklin Route 1.

These four boys, who have made outstanding records during the past three years at State college, will graduate in the class of '39.

Other members of the Franklin chapter, who are students at State college are: Charles Slagle, Sexton Vinson, Siler Slagle, Mack Setser, and Carter Hurst.

Raspberries Profitable For Mrs. J. T. McCoy

By S. L. WILLIAMS
Assistant County Agent

Mrs. J. T. McCoy, of the Goldmine section has made an outstanding record in the production of raspberries.

Six years ago Mrs. McCoy secured eight dwarf everbearing raspberry plants. From these eight plants she has transplanted new sprouts each year until she has established one-fourth of an acre. They are set in rows three feet apart, and 12-18 inches apart in the row. These raspberries are cultivated three times, beginning in February and ending in the middle of April, in other words, one time each month for three months. They are also pruned during this same period, leaving from 4 to 6 fruiting branches.

In 1937, Mrs. McCoy harvested 700 quarts which sold for an average of 12.5 cents per quart. The total cash receipts for the one-fourth acre being \$87.50.

In 1938, 800 quarts was harvested which sold for an average of 12 cents per quart, making a total of \$96.00.

Mrs. McCoy says any farm woman should have raspberries for home use as well as a cash crop.

After White House Consultation

Mrs. Fred Slagle's Chow Chow Recipe

Mrs. Fred Slagle, who has had many requests for her chow chow recipe, has furnished The Press with a copy, which we gladly reprint for the benefit of any who may be interested:

Chow Chow

- 1 large head cabbage
 - 1 qt. onions
 - 3 stalks celery, or 1/2 box seed
 - 1 doz. red sweet peppers
 - 2 doz. green sweet peppers
 - 3 qts. green tomatoes
 - 4 or 5 dill pickles
 - 1 box white mustard seed
 - tumeric to color slightly
- Chop vegetables, or run through coarse meat grinder and let stand in medium brine one night. Squeeze dry in the morning. Rinse through one water, squeeze dry again. Add enough vinegar to moisten well and 2 lbs. brown sugar. Bring to a boil. Mix 1/2 cup flour and 1/2 cup brown sugar with a little cold vinegar to make thin paste. Stir this in to thicken slightly. Add mustard seed, dill pickle, celery seed (or celery) and tumeric. Boil 5 minutes and seal.

State College Answers Timely Farm Questions

Q. Would it pay to seed oats as a nurse crop with the pasture seed mixture?

A. While it is true that you would get some earlier grazing, the injury from livestock trampling on the young seedlings and other factors would more than offset the benefits. The pasture would also be harmed by the excess use of plant food and moisture. In the long run it would be best to seed the pasture without a nurse crop. From two to four hundred pounds of a 4-12-4 fertilizer mixture should be used on the pasture to the acre with about two thousand pounds of limestone if the land has not been limed.

Q. What can I do for my chickens that have the pox?

A. There is little that can be done for the extreme cases. All birds in this class should be destroyed and those that are just coming down should be isolated and treated with carbolated vaseline or iodine applied to the spots. Rigid sanitation of the house should be carried out and the entire flock watched for new cases. All young stock, if any, should be vaccinated for prevention when from 10 to 12 weeks of age.

Q. How can I rid my calves of stomach worms?

A. Infected animals should be treated with a solution of copper sulphate and nicotine sulphate. One-quarter pound of clear blue crystals of copper sulphate should be dissolved in one pint of boiling water and then cold water added to make three gallons of the solution. One ounce of 40 per cent nicotine sulphate is then added to each gallon. Calves should receive from three to four fluid ounces of the solution; yearlings six ounces and animals two years old or older should be drenched with 10 to 12 fluid ounces. Animals to be treated should not receive any food or water for 12

Show Hogs Bring Average Of \$8.04

Fat hogs exhibited at the recent state fair brought an average of \$8.04 per 100 pounds, which was 29 cents more than the top price quoted on the Chicago livestock market the same day. This is an exceedingly wholesome sign that North Carolina is producing a fine grade of pork, according to H. W. Taylor, extension specialist at State college who directed the swine department.

The grand champion fat hog of the show, entered by Marion Pate, Jr., a 4-H club boy from Cumberland county, sold for \$12.25 per cwt. The champion pen of three fat hogs, shown by Graham Penny, a 4-H club member from Jackson county, brought \$9.50 per 100 pounds. The champion pen of 10, owned and exhibited by the Weil's Stock Farm of Wayne county, sold for \$8 per 100 pounds.

The entire lot of 40 hogs sold by the exhibitors was purchased by the White Packing company of Salisbury.

Entries were made by 4-H club members from Cumberland, Johnston and Nash counties. Adult exhibitors were Weil's Farm and Turlington's Duroc Farm of Harnett county.

POULTRY OUTLOOK

A larger hatch and increased market and storage supplies of poultry and eggs were cited by the U. S. bureau of agricultural economics as among the important developments expected in the poultry and egg situation in 1939.

to 14 hours before they are treated and no water for three to four hours after the treatment.

Improved conditions affecting the domestic demand for farm products have been reported by the U. S. bureau of agricultural economics. Industrial activity has expanded and consumer incomes have increased in recent months.
