McCORMICK-DEERING No. 7 ENCLOSED-GEAR MOWER

The Quiet, Long-Lived Mower That's Easy On Horses And Driver

We are anxious to have all our friends see the McCormick-Deering Enclosed Gear Mower. It is one of the finest pieces of farm machinery we have ever sold . . . and one of the most popular, too!

For example: The entire operating mechanism, including drive gears, differential, and countershafts, is assembled compactly in an oiltight gear housing and runs in a bath of oil. There are 10 high grade roller bearings, six on the main axle and four on the countershaft. Operations are so smooth and noiseless that you can scarcely hear the light hum of the sickle!

Special oil seals at the end of the main axle and flywheel shaft, and the oiltight gear box prevent leakage and protect all working parts against the entrance of dirt and other abrasive materials. Floating action of the cutter bar provides ample play without disturbing knife registration.

DECORATION DAY

THE ARMY OF THOSE who have passed on keeps marching through our memories. In our thoughts they live again in loving remembrance.

MEMORIAL DAY should teach all men the lesson of Service to Humanity. Only insofar as a man reveals his worth to others does he show his own worthiness.

LET OUR OBSERVANCE of this hallowed day be more than gestures of homage to the dead. Let every wreath that's laid upon the last resting place of a loved one symbolize a resolve to serve the living with love, forbearance, and neighborly concern. It is the way to peace and contentment.
