

## Recruits Solicited For U. S. Marine Corps

The U. S. Marine corps district recruiting headquarters at Macon with sub-stations at Atlanta and Augusta has been assigned a quota of 82 for the month of November.

Ambitious young men in excellent physical condition, between 18 and 31 years of age, 64 to 74 inches in height, single, of good moral character, who have completed at least one year in high school, or its equivalent will be enlisted.

A steady flow of promotion is afforded in the Marine corps, due to the recent re-distribution in grades for each additional 1,000 men recruited.

The Marine corps trains men as clerks (stenographers, typists, filing clerks, and general office work), aviation and automobile mechanics, electricians, radio operators and numerous other vocations.

Learn, earn and travel while serving in the best educated military service in the world. Marines serve at posts and stations at home and in many foreign lands and aboard ship.

Visit or write the nearest Marine corps recruiting station for full particulars and application blank for enlistment.

## This Month On the Farm

Bolivar Pigg, he sez, sez he:  
"When wild geese point their great big V  
Straight to the South then they are bound  
For where I'd surely like to be."  
—Sez Bolivar P., sez he.

November ushers in the first consistent cold weather of the year and a multitude of new farm tasks, so here are timely suggestions from State college specialists:

### Dairying

With the coming of cold weather, it is important that the young dairy herd receive a little extra care, advises John Arey, State college's well known extension dairyman. The herd should be provided with clean, comfortable quarters and a liberal growing ration. One of the important factors to remember in developing a heifer is the necessity of growing a large skeleton. To accomplish this, the calf should receive all the good quality legume hay she will eat, together with five to 15 pounds of silage daily, depending upon her age. In addition to the roughage, enough grain should be fed to keep her in a thrifty growing condition.

### Poultry

November is usually a month of profit for the poultryman, says Roy S. Dearstine, head of the State college poultry department. Pullets, if hatched at a reasonably early date, should be in full production, and old hens carried over either for breeding purposes or for egg production alone should be coming out of the summer molt and adding their quota to the supply of market eggs. Professor Dearstine also says that November is a month when culling pays big dividends. The laggards in a flock may be detected by a lack of definite bleaching and these should be marketed at once.

### Liming

The fall is an ideal time to apply lime for "sweetening" acid

### Tells How To Put Finish On Turkeys

Two observances of Thanksgiving Day this year should strengthen the market for turkeys, the traditional piece de resistance of the holiday feast. However, C. F. Parrish, extension poultry specialist of State college, says that turkey raisers should follow a proclamation of November 23 as Thanksgiving Day.

"Finish in young turkeys comes with maturity," Parrish said, "and maturity can be hurried only by feeding sufficient quantities of the proper food materials. It is generally considered, even under favorable conditions, that from 26 to 28 weeks are required for normal full feathering of young turkeys. This is necessary to avoid having short pinfeathers when the birds are picked and dressed."

If turkeys are being prepared for the November 23 Thanksgiving Day market, they should have plenty of grain now, this to be supplemented with a good growing mash, the specialist stated. The mash mixture is needed to cause normal feather growth as well as other proper finish in fat and flesh.

In tests at State college, it has been found that from 3 1/4 to 4 1/4 pounds of mash and grain are required to produce one pound of live turkey up to the 26th week.

Parrish recommends yellow corn as a fattening feed. Barley is also considered a very good grain to use, with oats coming next in order, and then wheat. A mixture of grains always gives good results, provided corn or barley, or both, make up a large part of it. This mixture, of course, should be used with a good growing mash.

### Should Place Orders For Fruit Trees Now

Fruit trees will pay dividends on any farm, and right now is the best time of the year to look over

soils, says C. B. Williams, head of the State college agronomy department. At this time of the year, the ground is usually dry and growers have plenty of time to apply the lime. Then through the winter, alternate freezing and thawing cause the lime to take in the lime readily.

### Swine

Here are November swine suggestions from H. W. "Pop" Taylor of State college: Pigs farrowed and raised on land free of parasites will grow faster, the gains will cost less, and the meat produced will be more wholesome; build or repair shelters and individual houses before real cold weather begins; one and a half to two bushels of rye per acre sown in early November will furnish winter grazing for hogs.

### Home Beautification

Now is the time to plant hardy or spring-flowering bulbs such as narcissi, tulips, and Dutch hyacinths, says Glenn O. Randall, horticulturist at State college. Then, too, sweet peas, poppies, pansies, and snap dragons may be planted now for spring blooming. The seed should be covered lightly with a mixture of screened rotted manure and garden loam soil. This is the month also to prepare beds for roses planted this fall.

### Machinery

Be sure that all farm machinery is well housed for the winter, says David S. Weaver, extension agricultural engineer. Leaving an implement out during the winter will do more damage than years of use. If you have leaky roofs on any of your buildings, have them repaired before the rainy season sets in.

nursery catalogues and order apple and peach seedlings, says H. R. Niswonger, extension horticulturist of State college in a message directed to every farmer in North Carolina: It is advisable to order one-year apple whips of the No. 1 grade nursery stock, and one-year peach trees, he stated.

Several varieties of fruit trees are recommended by Niswonger for North Carolina conditions. If apples are desired for home use, the horticulturist lists Yellow Transparent, Melba, Yellow and Red Delicious, and Stayman as the best varieties to plant.

The recommended peach varieties for home use are Greensboro, Arp Beauty, Heath Cling, Hiley, Belle of Georgia, and Elberta.

If the fruit trees are to be planted for commercial production, the best adapted apple varieties are Yellow Delicious, Red Delicious, Red Stayman, and Winesap, to which may be added Rome Beauty for the Blue Ridge mountain area and Limbertwig for the Brushy mountains. Varieties of peach trees for commercial production include the Hiley, Golden Jubilee, Belle of Georgia, and Elberta.

"Plant the trees as soon as they arrive from the nursery and do not allow the roots to dry out," says Niswonger. "Delay pruning until spring."

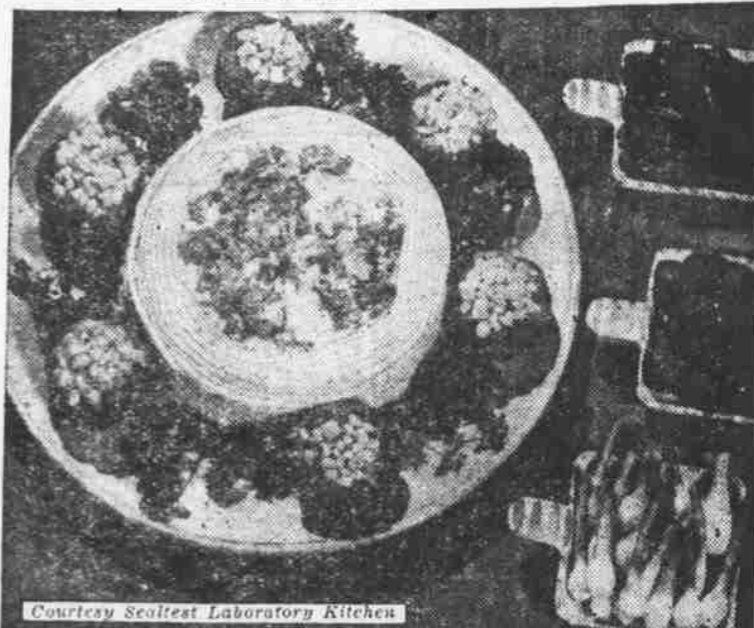

The extension specialist also advised the fertilization of fruit trees that bore heavy crops of apples and peaches this year in established orchards. "Apply one-half of the usual application of nitrate of soda or other readily available nitrogen fertilizer in the fall, and keep the other half until a month before the buds swell," he said.

### DIVISION

The farmer received about 40 cents of the consumer's dollar spent for 58 foods in the first seven months of the year, according to the U. S. department of agriculture.

## Spaghetti With Charm

By BEULAH V. GILLASPIE  
Director, Sealtest Laboratory Kitchen

WHEN a dish is so charming to see that you almost "hate to cut it," then you have something! And, that's the result of this savory, tempting Spaghetti Ring with Creamed Salmon. Satisfying, too, and quite economical.

### SPAGHETTI RING WITH CREAMED SALMON

1 9-ounce package spaghetti  
2 tablespoons butter  
2 1/2 tablespoons flour  
1 1/4 cups milk  
2 eggs  
1 to 1 1/4 teaspoons salt  
Few grains pepper

Cook the spaghetti in boiling salted water until tender. Drain. Line a well-buttered ring mold with strips of spaghetti coiled around the bottom and sides. Melt the butter in a double boiler, add the flour and mix well. Add the milk gradually

and cook, stirring constantly until thickened. Add gradually to the slightly beaten eggs. Add salt, pepper and the remaining spaghetti. Pour into the mold, place in a pan of hot water and bake in a moderate oven (350°F.) for 50 to 60 minutes or until set. Unmold on serving dish and fill the center with creamed salmon. If desired, garnish with parsley and baked tomatoes stuffed with buttered corn. Make Creamed Salmon as follows:

3 tablespoons butter  
3 1/2 tablespoons flour  
2 cups milk  
1/2 to 1 teaspoon salt  
Few grains pepper  
1 1-pound can salmon

Melt the butter in a double boiler, add the flour and mix well. Add the milk gradually and cook, stirring constantly until thickened. Add salt and pepper and flaked salmon. Re-heat. Serves six.

### Fugitive From Refrom School Arrested

The arrest of Jack Jacobs, alias Artie Jacobs, Franklin youth who escaped several weeks ago from a Kentucky training school where he was serving an 18-month sentence for automobile theft, was announced Monday at the United States

marshal's office in Asheville.

Jacobs was carried to Washington by United States Marshal Charles R. Price, and will be committed to the National Training school there to complete his sentence.

Jacobs was arrested in Franklin last week, three weeks after he fled from the Jefferson County Children's home at Louisville, Ky.

## Church Services

**Presbyterian Church**  
Rev. J. A. Flanagan, Pastor

Rev. J. C. Swalm, Pastor  
First Sunday, 11 a. m.—Union;  
2:00 p. m.—Hickory Knoll; 7:30 p. m.—Asbury.  
Second Sunday, 11:00 a. m.—Mt. Zion; 2:30 p. m.—Maiden's; 7:30 p. m.—Patton's.  
Third Sunday, 11:00 a. m.—Asbury; 2:00 p. m.—Mulberry; 3:00 p. m.—Dryman's; 7:30 p. m.—Union.  
Fourth Sunday, 11 a. m.—Patton's; 2:30 p. m.—Maiden's; 7:30 p. m.—Mt. Zion.

**St. John's Catholic Parish**  
Schedule of Masses:  
Franklin:  
2nd and 4th Sunday, 8 a. m.  
Murphy:  
Every 1st Sunday, 7 a. m.  
Cherokee:  
Every 3rd Sunday, 8 a. m.  
Waynesville:  
Every Sunday, 11 a. m.

### RESEARCH

The new regional laboratories set up by the U. S. department of agriculture will have as their main purpose the search for wider uses for farm crops, particularly the surplus crops.

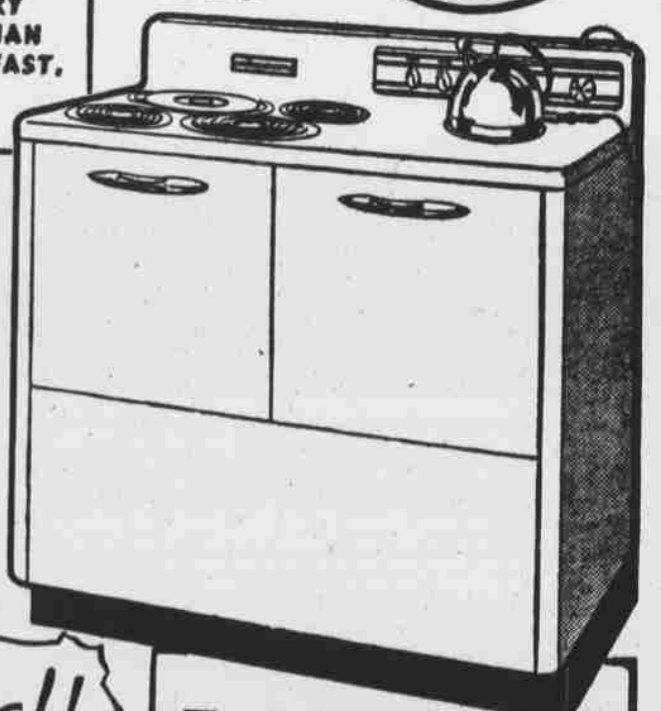

## New General Electric Range Simplifies the Fine Art of Good Cooking!

THIS NEW GENERAL ELECTRIC RANGE IS MAKING ELECTRIC COOKERY MORE POPULAR THAN EVER. IT'S SIMPLE, FAST, ECONOMICAL—AND A BARGAIN, TOO!

It's easy to stay young electrically—with a G-E Range

The swing is to the electric range and more than 2,000,000 women now cook electrically—for it is sure, fast and economical, besides keeping your kitchen so clean and cool. You can own this beautiful new General Electric Range today at a new low price and on an easy payment plan.

### Special!

The General Electric "Yardley" yours today for only

A SMALL DOWN PAYMENT  
BALANCE ON CONVENIENT TERMS

36 inches wide. 3 surface units. Thrift Cooker. Lamp and Condiment Set at no added cost.

### The G-E Speedster

with Elektrikettle at no extra cost!

All-Steel One-piece Body. Porcelain Enamel inside and out. No-stain Vent and Oven Moisture Control. Adjustable Non-Tip Sliding Shelves. Porcelain One-piece Unitop. Accurate Oven Temperature Control. Thrift Cooker. Select-A-Heat Calrod Cooking Units. Famous Tripl-Oven. Generous Storage Space.

And Now Popularly Priced!
