## Only Chevrolet has this EXCLUSIVE VACUUM-POWER SHIFT!

—and only Chevrolet's Exclusive Vacuum-Power Shift has a hidden power cylinder which does 80% of the gearshifting work for you!

Why shift for yourself? Why do it the hard way? Chevrolet's Exclusive Vacuum-Power Shift is controlled from the steering column by an extra-short lever—its end right under the rim of the steering wheel, within easy finger reach. The only effort required of the driver is to move the lever; the vacuum cylinder supplies the effort required to move the shifter forks and gears within the transmission. Instead of supplying all the effort of shifting, the driver supplies only one-fifth; the compact, simple vacuum mechanism, positive and unflinching in operation, does the rest.

80% AUTOMATIC—ONLY 20% DRIVER EFFORT!

ALL steering column gearshifts look more or less alike. . . . But only Chevrolet's New Exclusive Vacuum-Power Shift acts for itself when you touch the lever. . . . Only this one advanced steering column gearshift is 80% automatic in operation!

You see, Chevrolet's New Exclusive Vacuum-Power Shift has a hidden power cylinder. And this power cylinder goes into action the instant you start to shift gears. It does 80% of the work for you instead of letting you push and tug and do all the work yourself!

You want the newest and best—the best in driving and riding ease, the best in styling and road-action—and on all these counts "Chevrolet's FIRST Again!"
