SEE ASHEAR For Your Easter Suit

John: "I need a new suit for Easter—and I want a good one."

Bill: "Well, take a tip from me John, you can get a better suit at Joe Ashear's, and at a lower cost, than any place I know. I saw some real nice suits there the other day—sports and plain backs, single and double breasted; blues, browns, grays, and greens—if you want a good suit, you will find it at Ashear's—besides you can depend on what they say and recommend. They have cheap suits, but they will tell you about that."

John: "Well, what should I expect to pay for a suit there?"

Bill: "Of course you know you get only what you pay for. Their best suits range in prices from \$15.00, \$17.50 and \$19.95. And another thing, John, if you are hard to fit, and can't find in their large stock your size, you still have ample time to have them take your measure for a tailored suit for Easter. You will have a choice of 300 samples to select from—and tailored by the famous International Tailoring company. They have anything else in the clothing line you might need for yourself or family, such as hats, shirts, shoes, all wool pants, work clothes, in fact everything the family will need. You won't make any mistake in trading at—

State College Answers Timely Farm Questions

Q. What is a good number of chicks to start a semi-commercial poultry flock?

A. According to C. F. Parrish, extension poultryman at State college, the farmer can usually secure good profits if he starts a flock of 300 chicks. This number is about all that can be handled properly in addition to other farm work. However, Parrish warned that only quality chicks should be started. A few cents more paid for each chick at this time will be returned many-fold in increased egg production.

Q. When should I sow pasture land?

A. North Carolina farmers are sowing pasture at the present time, since the best spring dates are from February 15 to April 1. Carpet grass, dallis grass, and lespedeza should always be sown in the spring. They may be sown on top of other grasses and clovers planted the previous fall. Bermuda grass cuttings may be set out in March, since the seed are rarely used in this state.
