Huge Improvement in Gulf Gasolines

To measure the quality of a gasoline, no hocus-pocus is needed.

There is a scientific test that shows the comparative anti-knock value of any motor fuel.

The shorter figure above represents the former "mark" in that test of GOOD GULF. But look at the second figure! It shows precisely how much the NEW GOOD GULF has been stepped up—a step up so great that this great gasoline now surpasses North Carolina specifications for premium fuels. Try Good Gulf and see what a difference it makes in your car.

Above, at left, is the pre-improvement "mark" of GULF NO-NOX—for years one of America's best premium gasolines.

But hang on to that hat again as you look at the other figure! It shows how much GULF NO-NOX has been lifted over its old high—a high that by far exceeds North Carolina specifications for premium fuels. And when you consider that the old NO-NOX was knockproof under all normal driving conditions, you will marvel at the performance this new gas gives.

Introduce your car to Gulf No-Nox today at the Sign of the Gulf Orange Disc.
