## Nantahala National Forest

Did You Know That

Of the ten fire lookout towers operated by the U. S. Forest Service on the Nantahala National Forest five are located in Macon county. In addition, one tower (Frye Mtn.) is operated by the National Park Service and another tower (Toxaway) is operated by the State Forest Service.

These towers are all connected by telephone line. They are at present all occupied by regular lookouts and CCC enrollees, who are keeping a vigilant watch for the tell-tale wisp of smoke indicating the presence of a forest fire.

Fire finders are located in each tower which enable the lookout to plot the exact location of any fire spotted. Some of the lookouts, veterans of many a fire season, have developed uncanny judgment in spotting fires, determining their origin and estimating their spread. Practically every fire that starts is picked up by the lookouts within 15 minutes after it starts.

The exceedingly dry weather during the months of September and October has resulted in the woods becoming tinder - dry. Hunters, woods-workers, and farmers should be exceedingly cautious with their fire to see that none gets out into the woods.
