"Ten Years of Progress" By MRS. O. V. MINCEY

Within the past ten years our community has made some progress along with the rest of the county.

We have a paved rural route which is a great convenience for the school.

Electric lights the same as in towns and cities. The rates are reasonable, and does not by far exceed the cost of kerosene lamps.

There have been some improvements.

We also have a power line which serves the community. Some have taken advantage of this and have ment in living conditions, but not as much as should be. More people try to have gardens and grow the necessary things needed for table use in their homes. Poultry raising is rapidly developing in our community.

Mining for mica at this present time is easier than 10 years ago as we have modern equipment, namely: electric lights, air pumps and cars.
