## Careless Cooking Destroys Vitamins

Valuable vitamins are destroyed when tender springtime greens are boiled too long or stirred too much, Miss Ruth Current, State home agent of the N. C. State College Extension Service, is warning North Carolina homemakers.

At the same time, she pointed out the need of more vegetables and more different kinds of vegetables in the daily diet so as to maintain good health.

The State home agent explained that vegetables are excellent sources of vitamins and minerals, and that overcooking tends to destroy some of these essentials, especially Vitamin C and Vitamin B1. The addition of baking soda to leafy vegetables causes the loss of Vitamin C.

One of the popular and nutritious of summer vegetables is the tomato, an excellent source of Vitamin C.
