## PROF. SUMMER HAS RESIGNED

### To Be Principal Of School At Bryson City

In the resignation of Prof. O. F. Summer as principal of the school here, to accept a similar position with the Bryson City school. Highlands is losing one of its most civic-minded and representative Citizens. During the fifteen years Mr. Summer has been here, the school enrollment

and number of teachers have materially increased, and the high school raised from a non-accredited high school. The school building has been enlarged by the addition of a wing and the enlargement of two rooms into classrooms. An auditorium has been built which houses as a part of the school property, a moving picture theatre as well equipped as that found in the average city, where Highlands people have the pleasure of seeing the first run of feature pictures at the same time they are being shown in New York City—a long step from the first sound picture machine personally operated by Mr. Summer for several years, when reels had to be changed every ten minutes.

Several hundred dollars of theatre funds were used in finishing the auditorium and another several hundred dollars of theatre funds have been spent in beautifying the grounds through the building of rock walls and the planting of shrubbery and flowers.

Under Mr. Summer's guidance the school has maintained a high standard of work and graduates of the high school who entered colleges have done well. Another mark of progress during the last three years of Mr. Summer's principalship has been the issuance of a monthly school paper by the high school students, whereby they were given valuable training in the mimeographing and publishing of a newspaper.

Mr. Summer's life profession is first of all teaching. He is a Mason, past president of the chamber of commerce, past president of the P. T. A., an elder in the Presbyterian church, and for several years has been county chairman of Christmas seal sales.

Mrs. Summer is a talented musician, always giving gladly of her talents as a singer and pianist whenever and wherever called upon. Both she and Mr. Summer will be greatly missed in the community which, for many years they have been so much a part of, and the best wishes of their Highlands friends go with them into their new field.

Rev. Oscar Nix of Georgia is to serve the Pine Grove Baptist Church during the next year. Rev. Frank Reed of Santolah, Georgia, has been pastor for the past four years and his faithful service is recognized by the community. Rev. Frank Holland of Cullasaja has been holding a series of meetings in the Walnut Creek

Schoolhouse. The services have been attended by many. Jimmie Keener of Walnut Creek has gone to stay with Mr. Clark of Jackson County.

A number of boys of the Ellijay and Sugarfork townships are serving as caddies at the Highlands Country Club Golf Course. A truck transports them to and from the Club.

## CHANGING STANDARDS

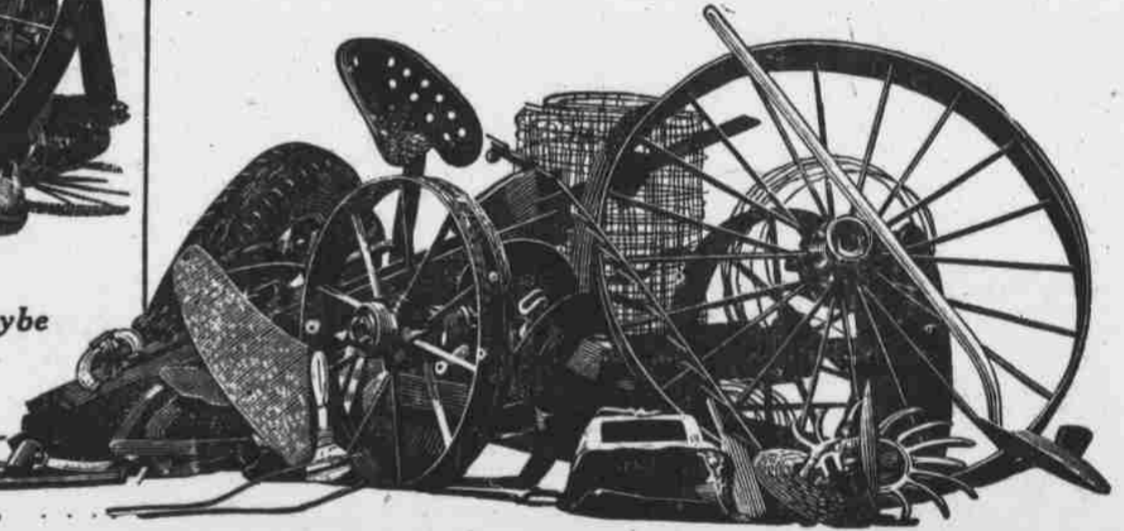

Changes in American standards, brought about by priorities have not lowered our high standards of service. We continue to provide appropriate funerals of fine quality at prices set by the families when they make arrangements.

# JUNK needed for War

"What's it good for?"  
"Guns, tanks, and maybe part of a plane"

In the barnyards and gullies of farms and in the basements and attics of homes is a lot of junk which is doing no good where it is, but which is needed at once to help smash the Japs and Nazis.

Scrap iron and steel, for example.

Even in peacetime, scrap provided about 50% of the raw material for steel. It may be rusty, old "scrap" to you, but it is actually refined steel—with most impurities removed, and can be quickly melted with new metal in the form of pig iron to produce highest quality steel for our war machines.

The production of steel has gone up, up, UP, until today America is turning out as much steel as all the rest of the world combined. But unless at least 6,000,000 additional tons of scrap steel is uncovered promptly, the full

rate of production cannot be attained or increased; the necessary tanks, guns and ships cannot be produced.

The rubber situation is also critical. In spite of the recent rubber drive, there is a continuing need for large quantities of scrap rubber. Also for other waste materials and metals like brass, copper, zinc, lead and tin.

The junk which you collect is bought by industry from scrap dealers at established, government-controlled prices.

Will you help?

First—collect all of your waste material and pile it up. Then—sell it to a Junk dealer, give it to a charity, take it yourself to the nearest collection point, or get in touch with your Local Salvage Committee.

If you live on a farm, consult your County War Board or your farm implement dealer.

Throw YOUR scrap into the fight!

## JUNK MAKES FIGHTING WEAPONS

One old disc will provide scrap steel needed for 210 semi-automatic light carbines.

One old plow will help make one hundred 75-mm. armor-piercing projectiles.

One useless old tire provides as much rubber as is used in 12 gas masks.

One old shovel will help make 4 hand grenades.

### MATERIALS NEEDED

Scrap iron and steel.  
Other metals of all kinds.  
Old rubber.  
Rags, Manila rope, burlap bags.  
Waste Cooking Fats—When you get a pound or more, strain into a large tin can and sell to your meat dealer.
