On August 11, the Walnut Creek

Home Demonstration Club will

hold their annual picnic at the

Walnut Creek schoolhouse. The

families of each member are in-

vited to attend. The guest speak-

ers who have been invited for the

occasion are Mrs. J. W. C. John-

son, editor of The Franklin Press and Mrs. J. E. Perry, chairman

of the Red Cross production in

Macon County. All are invited to

bring well filled baskets and to

plan to enjoy the day as last

year's picnic was a great success.

Winter barley acrage, which has jumped from 9,000 to 53,000 in North Carolina during the past five years, is expected to show another substantial increase this fall, says Dr. G. K. Middleton, agronomist of the Agricultural Experiment Station at N. C. State College.

There are three principal reasons for this rapid expansion inacreage, Dr. Middleton pointed out. They are: (1) an increased recognition of the importance of soil conservation; (2) the possibility of using barley for both fall and spring grazing and as a grain crop for livestock; and (3) the the advilability of sufficient seed of improved varieties.

Barley is now being recommended as a substitute for corn on mountain soils where erosion is a problem and where there is The annual Peek-Henderson renion will be held at the Pine a shortage of farm labor. A program will be held in the the fertility of the soil and inmorning and the afternoon will crease it with a small grain, lesbe spent in visiting with friends pedeza rotation, than where cultivated crops are introduced into the rotation.

Barley will not do its best on such soils, for like other crops it responds best on fertile, welldrained soils. It is suggested for soils subject to erosion simply as a conservation method.

When grown for grain, barley should be seeded in the mountains during September, however, if land is available and can be prepared early, the crop may be seeded four to six weeks earlier and provide splendid fall grazing.

Rather extensive yield trials have been conducted with barley varieties during the past ten years. On the basis of results, the choice of varieties to be grown for grain only would be in the following the Chatham concern is the only order: Sunrise, Davidson, Ranone between Baltimore and Miami. dolph, and Iredell.
