

FARMERS URGED TO SEED SOYBEANS

As everyone knows it is becoming most difficult to secure cotton meal and other protein foods. In all probability this condition will become worse. We do not want this condition to prevent the increased production of milk and meat.

We are suggesting that our farmers seed soybeans. This crop will furnish a mighty good feed and can be used in more ways than one to relieve our protein food shortage.

PASTURE: Soybeans furnish an excellent grazing crop for cattle, hogs, and chickens. Hogs on soybean pasture and fed one pound of corn daily for each hundred pounds of live weight made an average gain of one pound per day.

CORN AND SOYBEANS: Plant one row of corn and one row of soybeans. Turn your hogs on this mixture when the corn begins to get hard. It will furnish quick cheap gains with no expense for harvesting.

HAM: Soybean hay when properly cured and is a good feed for cattle, hogs, and chickens. You would be surprised at the amount of soybean hay a hog will eat if it is put in a rack where the hog will not waste it.

FEED: The seed of the soybean is a high protein feed and can be used in place of cotton meal but not in a large amount. Do not feed more than one half as much as cotton meal. About 20 pounds to 80 pounds of corn meal, 20 lbs. to 40 lbs. corn meal and 40 lbs. of coarsely ground wheat or ground oats.

We are still taking orders for Government Wheat and the farmers that are using it are liking it fine.

Plan now to produce all your roughness and as much of your gain as possible.—Sam Mendenhall, Farm Agent.

Ellijay

By HAZEL AMMONS

Saturday night, Sunday morning and night, Rev. W. A. Nicholson will preach at the Ellijay Baptist church. There will also be a Decoration Sunday; everybody is invited to attend.

The Rev. William Breedlove filled his regular appointment Sunday, May 23.

“How did I know you'd need bombs?”

MORE than half the bombs this country makes exist by what you might call an "accident." "Some accident, too! I saw it happen." "It was 1935. We research workers at Esso were trying many things with petroleum to see what else we could learn about it. And up came a process for synthetic toluol." "Well, you need toluol to make TNT. But coal-tar was providing all the toluol the country needed—then." "However... all the toluol you could get from coal-tar would make far less than half the TNT we're using now! The other half is made by that Esso process perfected back in 1935." "Now... I didn't know then that you'd

need bombs, and neither did you. And I can hear a lot of people say 'Boy was that discovery a lucky thing!'..."

"But I don't call it luck. I call it the American idea at work. We hit on that process because free American people expect so much that American companies have to learn everything they can about new and better methods just to stay out front in business."

"If this war didn't prove anything else, it would prove that nothing like America ever existed anywhere before."

What other idea ever did so many people so much good in peacetime? What other idea ever turned out so much might so fast in time of war?"
