Macon Silk Hose Drive Reports Total Of 200 Lbs.

Waste Fats And Tin Can Collection Being Pushed

The Woman's Salvage Division of Macon county recently shipped 90 pounds of discarded silk and nylon hose, making a total of 200 pounds collected in this successful salvage drive. These materials are being used in the manufacture of powder bags, parachutes, and other equipment for military uses. In announcing the discontinuance of the stocking drive, Mrs. Florence S. Sherrill expressed appreciation to the merchants of Franklin and Highlands for serving as collection centers, and to the women who personally delivered the hosiery to the stores.

Tin For Syrettes

Mrs. Sherrill states that our government continues to need

waste fats. Homemakers who have allowed fats to become rancid should turn them in to the markets since they retain a good amount of glycerine.

Tin cans will continue to be needed in the war effort. Homemakers should prepare these by washing, removing labels, and flattening. In the town of Franklin, the Junior Commandos under the leadership of Mrs. Sophia P. Cunningham have collected the prepared tin cans and had them ready for shipment. These are now being stored at the Scout House on Church street. In quoting from the N. C. Salvage Division, Mrs. Sherrill stated, "It required 100% tin to make syrettes. No other metal will serve. One syrette may save the life of a wounded American soldier. Tin cans provide an important source of tin. Is it worth bothering to save your tin cans?"

Dogs Wanted

I will be in FRANKLIN, FRIDAY, NOVEMBER 5th to buy good sized, nice looking hounds, from 1½ to 5 yrs. old. I don't care anything about the hunting qualities of the dogs. Their age, size and looks is all I am interested in.

HARMON GARY.

"Naturally, I don't know when the war will end..."

"The sooner the better, is all I can say. But I know that until it ends, you and I have a duty to your car that gets more important every day..."

"EVERY CAR that still runs is an essential cog in the country's whole transportation scheme. As the older cars quit, the ones still left get more and more essential.

"I'm not making scare-talk when I say that even standing in a garage most of the time, your car gets run down. Metals corrode. Oil gets dirty and sludgy. Grease dries out. The battery runs down. Spark plugs get fouled up. Radiator hose connections go bad. Tires get soft, so the sidewalls bend and crack.

"In these times, it's a crime to let this happen. Because you don't have to! Almost anyone's car can see him through, if he'll give it a chance.

"We're still here with everything it takes to help protect your car, whatever make it is. You find us short-handed sometimes, but we're long on experience and good equipment and reliable Esso products. "However little you drive, you need winter oil and a winter grease job. Your battery fit and strong.

Your radiator tight and ready with anti-freeze. Your tires checked over, maybe switched around to get the most out of them. This is mighty important right now—to keep your car in service for the duration. Come on in. Right this week. Winter's getting close!"
