

TOWN and FARM in WARTIME

Prepared by OFFICE OF WAR INFORMATION

REMINDERS

MEATS, FATS—Red stamps A8 through W8, good indefinitely; X8, Y8, Z8, become good July 2.

PROCESSED FOODS—Blue stamps A8 through V8, good indefinitely; W8, X8, Z8, and A5, become good July 1.

SUGAR—Sugar stamp 30, 31 and 32 each good for 5 pounds indefinitely. Sugar stamp 40, good for 5 pounds of canning sugar through February, next year.

GASOLINE—In 17 East Coast States, A-10 coupons, good through August 8. In States outside the East Coast area, A-12 coupons, good through September 21.

FUEL OIL—Period 4 and 5 coupons, good through September 30. New Period 1 coupons for the 1944-45 heating year may be used as soon as they are received from local boards.

SHOES—Airplane Stamps 1 and 2, good indefinitely.

Army Trucks for Farm Use
The farmer in critical need of a truck may apply to his county Agricultural Adjustment Agency committee for a used Army truck, the War Food Administration announces. Upon the basis of applications on hand and further investigation, AAA offices prepare letters certifying to the needs for available trucks. These letters authorize truck dealers to negotiate with proper authorities and buy the trucks for resale to approved applicants. WFA warns that for some time relatively few persons who need trucks for essential agricultural purposes will get them.

Plentiful Foods for July
Foods that will be plentiful in most of the country during July include: eggs; frozen vegetables; canned green and wax beans; dry-mixed and dehydrated soups; peanut butter; citrus marmalade; soya flour, grits and flakes; wheat flour and bread; macaroni; spaghetti; noodles; oatmeal and rye breakfast foods, WFA says. Fresh apricots will be plentiful in the Pacific Coast area and fresh snap beans in eastern U. S. Fresh peaches are expected to be plentiful in July and August.

Round-up
OPA announces that it may establish ceilings on wage rates for independent contractors for services rendered on farms, where the War Food Administration has established maximum wage rates of farm workers. . . . Used car rationing is not planned at this time or for the future, so far as OPA knows. . . . Unused farmers' PR-19 certificates held by dealers have the same standing as new certificates for the purchase of farm supplies, WPB says. . . . Passenger travel for the first quarter of this year was 25.5 per cent over traffic in the same quarter last year, OWT reports. . . . To insure travel facilities for disabled military, naval and merchant marine personnel, railroads may cancel passenger train service and refuse permission of passengers other than disabled personnel or attendants to board trains, ODT has announced.

Some Foods Again Rationed
The OPA has restored rationing to best cuts of lamb in order to get better distribution among consumers, and it has restored point values to certain types of cheese and canned asparagus, peas and tomatoes, which were unrationed for two weeks because of large stocks on hand.

National Restaurant Regulations
For the first time, public eating and drinking places will be covered by a national restaurant regulation July 31, when they must post their April 4-10, 1943, base period ceiling prices for 40 basic menu items served, OPA announces. However, a cup of coffee with sugar and cream may sell for no more than a nickel at any establishment that did not charge more than a nickel for it October 4-10, 1942.

Housewives Help Save Eggs
The extra egg-buying of American housewives has made it possible to save the 25 million dozen of eggs that were in danger of spoilage a few weeks ago for lack of storage space, War Food Administrator Marvin Jones said. Retail stores, newspapers and radio were of great help in calling attention to the problem, he said.

10:00 a.m.—Church school.
7:30 p.m.—Preaching.

ST. JOHN'S CATHOLIC PARISH
Waynesville, every Sunday 11 a.m. Franklin, every 2nd and 4th Sunday, 8:00 a.m.

ing your home for winter now, be you owner or merely a leaseholder, the Federal Housing Administration says. An FHA Title loan will enable you to borrow enough to pay for both materials and workmanship needed to insulate your home, to repair your heating plant, to install storm windows—up to as much as \$2,500. You can borrow enough for any or all of these things without down payment, without security and with three years in which to pay, FHA says. Get best prices on jobs you want done, then get your dealer or contractor to tell you where you can get an FHA Title 1 loan to cover the entire bill.

Future Farmers Put Food Profits in Bonds

Throughout the nation the FFA boys are making a substantial contribution to the war effort through the production of the all-important food supply and purchase of War Bonds with their profits. Shown here are some instances. No. 1 shows Robert Hill of the Welcome Chapter FFA, North Carolina, with three of his eight registered dairy calves. North Carolina FFA boys owned 9,299 dairy cows and invested profits in War Bonds totalling \$308,650. No. 2 shows two Wilson County, Tennessee, boys of the Green Gale Chapter at Lebanon repairing farm equipment. At an auction of this farm equipment, a total of \$85,000 went into War

Bonds. No. 3—Edward Jones of Pittsboro Chapter FFA, North Carolina, and some of his 455 high-producing victory hens. Edward made a net profit of \$548.12 from his flock last year and is putting his profits in War Bonds. No. 4 shows Colin English, State Superintendent of Public Instruction, Herbert Shuman, president Palmetto Chapter FFA, and Harrison E. Barringer, State Senator, all of Florida, at the high light of an annual Father-and-Son banquet. The Florida Future Farmers bought a \$1,000 War Bond with the funds from their farm produce grown on their own class project. Back the Attack—Buy More Than Before.

Great Improvement Shown in Test Farms

The State Department of Agriculture has expended approximately \$100,000 during the past 12 months laying the foundation for a long-range program looking to the adoption of agriculture in North Carolina to the needs of the post-war world.

These funds have been used for new farms in Ashe, Haywood, and Washington counties, and for various improvements in the old farms. The Ashe farm will be used for Brown Swiss, a new type cattle which is being brought into the state, beef cattle, and sheep. On the Haywood farm, the Clark place on the outskirts of Waynesville will be placed dairy cows and projects to be carried out at this station will be concerned with greater milk production for the mountain counties, with poultry, horticulture, and burley tobacco. The state's largest test farm is now in Washington county, five miles east of Plymouth. This land will be used for test in hybrid corn, small grain, soy beans and lespedeza.

Since 1937 many acres have been added to the old farms and many improvements made. As soon as materials are available, new and modern barns and other buildings will be erected at the new farms.

Work now being carried for-

ward on the test farms should mean a new day for agriculture in this State and in the South.

SECRETS OF EARLY GRAZING EXPLAINED

Some of the secrets of good winter and spring grazing are high rates of seeding, earliness of planting, and good fertilization, say reports of county to the Extension Service officials at State College.

These points are covered in reports on the pasture practices of J. D. Parker of Moore county, Ralph Scott of Alamance, and John Harris of Anson.

Parker planted 4 bushels of oats, 30 pounds of clover, 40 pounds of Austrian winter peas, and 50 pounds of lespedeza per acre. Scott used 2 bushels of barley, 2 bushels of oats, and 8 pounds of crimson clover. Harris seeded 2½ bushels of oats, barley, and rye, and 12 pounds of vetch.

Parker planted his oats, clover, and peas on September 11 and the lespedeza on February 1. Scott seeded his mixture on September 15 and Harris on September 28.

Parker fertilized his crop with 1,500 pounds of lime, 800 pounds of superphosphate, 200 pounds of nitrate of soda, and 100 pounds of muriate of potash per acre. Scott used 300 pounds of 4-10-4 fertilizer at seeding

and topdressed with tobacco stems. Harris applied barnyard manure at planting and topdressed with 150 pounds of nitrate of soda.

Scott got 22 days of grazing during November and December and about two months grazing in the spring. Moore reported that he began his grazing about

two weeks late, April 11, with 26 head of cattle, 2 horses and 4 mules on 10 acres. On April 30, he brought in 75 sheep and 110 goats to help graze off the field and they grazed for 15 days. Harris had 2 cows and 1 heifer on 3 acres from November to April 1, cut about 1½ tons of hay, and then planted the field to cotton.
