Bring State Total

To 336

Eighteen more cases yester-day brought the total since June 1 to 336. The current outbreak of the disease is expected to reach its greatest number this month and decline during August, Dr. C. P. Stevick, epidemologist of the state board of health, said yesterday.

More than \$91,000 has been raised by the state headquar-ters of the National Foundation for Infantile Paralysis, C. H. Crabtree, state representative said. \$50,000 was a contribution from the national office.

The County Board of Health of Macon County, at a meeting held on July 18, 1944, for the purpose of considering measures to be taken to prevent the introduction of infantile paralysis into this area from other areas in Piedmont, North Carolina, where the disease has appeared in epidemic form, adopted the following findings and order:

That there are now no cases of infantile paralysis in Macon county or in any adjoining counties, nor does it now exist in epidemic form in any area within more than 100 miles of

That while no emergency now exists in this county in order to prevent any opportunity for contact, all parents are strongly urged to keep all children, under the age of 12, on their

More Polio Cases own premises so long as the disease exists in epidemic form anywhere in this State, and during that time not permit them to assemble or congregate ture shows, church schools swimming pools, or at any other places whatsoever.

IT IS ORDERED that all children whatsoeyer, under the age of fifteen, who come into Macon county from any area where infantile paralysis exists in epidemic form, be placed under strict quarantine for a period of three weeks from the date of their coming into this

It is believed that house flies are one means of spreading infantile paralysis and, therefore, all persons are strongly urged to take all steps necessary to eliminate all places breeding or

attracting flies.

Ray Orr To Aid In Timber Cutting

The services of Ray Orr have been secured to help farmers in making and estimating the timber that is ready to be cut, S. W. Mendenhall, county agent, announced. This information is particularly valuable for any person who plans to sell timber from the stump as Mr. Orr can cruise this timber and give an estimate of the number of feet in the boundary. No charge is made for the work done by Mr. Orr. Anyone desiring an estimate on the timber that he wishes to sell should notify the County Agent, who will see that Mr. Orr visits his farm.

The farmer who has timber that is ready to cut should make every effort to get this timber to the market since it is needed badly in the war effort. The price of timber is the highest that it has been in years which is another good reason why farmers should market their timber now. However, extreme care should be taken regarding the future crop of cratic vote cast in the last gen-
