

Weekly Roundup Of OPA Price and Rationing News

Week of September 17
Meats and Fats: Red stamps, V2, W2, X2, Y2, Z2, now valid, expire September 30. A1, B1, C1, D1, S1, now valid, expire October 31. F1, G1, H1, J1, K1, now valid, expire November 30. L1, M1, N1, P1, Q1, now valid, expire December 31.

Sugar: Sugar stamp No. 38 now valid, expires December 31.
Shoes: Airplane stamps Nos. 1, 2, 3, 4, now good.

Slaughter Controls Suspended
 Controls over how much livestock can be slaughtered and where the meat may be shipped have been suspended by OPA, it was announced by Chairman of the War Price and Rationing Board.

This action was taken on the recommendation of Secretary of Agriculture Clinton P. Anderson, and meat rationing is not affected, he added.

He said that there has been "marked improvement" in the civilian meat supply during recent months but that it is still not sufficient to assure the best distribution without the help of rationing controls.

Gas To Cost Less
 Gasoline and fuel oil will cost less at retail in the eastern seaboard area effective at once it was disclosed.

The reduction in retail gasoline ceilings will be 1.2 cents a gallon throughout the 17 states with the following exceptions: In Florida east of the Apalachicola River and Georgia, where the reduction will be 6/10 of a cent a gallon.

The reductions represent, in general, the increases in ceilings granted during the war period to help defray the extra cost of transporting petroleum products to the eastern seaboard area, when normal tanker transportation had to be abandoned.

State College Hints To Farm Homemakers

By Ruth Current
 N. C. State College
 Who is an "Intelligent buyer?" An intelligent buyer is one who gets the best possible value in goods or services for every dollar spent. This is based, first of all, on planning—planning for wise spending in all the departments that make a home a going concern. He can "make or do without" when it comes to household equipment and clothing, but man must eat—and women, too—and meals of the right kind are the basis of health.

Buy by the pound whenever you can instead of by the dime's or quarter's worth, or by the basket. Always watch the scales to make sure you get all you pay for.
 Remember brown shell eggs are just as good as white ones, and vice versa. The color of the shell has nothing to do with the food value of the egg inside.

The twenty-fifth anniversary celebration of the North Carolina Federation of Home Demonstration Clubs at State College revealed that rural women have taken a leading part in all progressive movements in the state in recent years.

State Club Leader L. R. Harrell of State College says that 4-H dairy production contests will be held in conjunction with the Junior Dairy Cattle Shows to save time and travel.

The supply of home-grown hybrid corn seed will be greatly increased this year but will not furnish nearly enough seed to meet the demand.

Hatching eggs should be in great demand during the coming year, says Prof. Roy Dearstyne, head of the Poultry De-

Seaboard Ry. Features "Old North State"

The Seaboard Air Line Railway is currently featuring the State of North Carolina on its dining car menus. A beautiful color etching of the Capitol at Raleigh illustrates the front cover, while a brief history of early and romantic days in the Old North State appears on the back. This record of colonial pagentry reads in part as follows:

"When the Great Armada had been destroyed, relief was dispatched to the Carolina Coast. By August 9, 1591, the fleet reached Roanoke Island. Solitude only was there. On the trunk of a giant tree was cut a single word—CROATAN. There was no other trace of that lost colony and the world today is ignorant as to what calamity befell the hapless company.

"Permanent settlement began in 1658 and so well did those Carolinians build their commerce and culture, their basic unity of purpose, that in 1774 Washington merchants were emboldened to dump boat loads of highly taxed tea into the Cape Fear River. On May 20, 1775, a group of distinguished men convened at Charlotte and adopted 'The Mecklenburg Resolve'. Bolding declaring, 'We the citizens of Mecklenburg County do hereby absolve ourselves from all allegiance to the British Crown', this famed document was in reality the first Declaration of Independence.

"Seven years after Yorktown, North Carolina joined the Union. Since that long ago day in 1788, she has steadily moved to the fore. North Carolina's future holds promise fairer than her stirring past—her splendid present."

The menu is one of a series advertising the six Southeastern states served by the Seaboard.

ADMINISTRATRIX NOTICE
 Having qualified as administrator of O. C. Hall, deceased, late of Macon County, N. C., this is to notify all persons having claims against the estate of said deceased to exhibit them to the undersigned on or before the 30th day of August, 1946, or this notice will be plead in bar of their recovery. All persons indebted to said estate will please make immediate settlement.

This 30th day of August, 1945.

A chicken drinks 2 pounds of water for each pound of feed eaten. Waterers must be kept filled despite the fact that it is almost an endless job.

Average yields of oats at the Piedmont Test Farm at Statesville have been more than twice as large when planted October 1, as when planted on November 15.

National Forest Timber for Sale

Sealed bids will be received by the Forest Supervisor, Franklin, North Carolina, up to and not later than 2:00 p. m. October 8, 1945, and opened immediately thereafter, for all live timber marked or designated for cutting and all merchantable dead timber located on an area embracing about 675 acres within the Appletree Unit, Nantahala River watershed, Macon County, Nantahala National Forest, North Carolina, estimated to be 300 M feet, more or less, of yellow poplar, northern red oak, white oak, sugar maple, basswood, cucumber, white ash, black cherry, birch, red maple, black oak, chestnut oak, scarlet oak, beech, buckeye and hickory sawtimber. No bid of less than \$14.00 per M feet for yellow poplar; \$11.00 for northern red oak; \$9.00 for white oak, sugar maple, basswood, cucumber, white ash and black cherry; \$4.00 for birch and red maple; \$3.00 for black oak; \$2.00 for chestnut oak; and \$1.00 for scarlet oak, beech, buckeye and hickory will be considered. In addition to prices bid for stumpage a deposit of \$1.00 per M feet for all sawtimber cut will be required for sale area betterment work. \$500.00 must accompany each bid, to be applied on the purchase price, refunded, or retained in part as liquidated damages, according to conditions of sale. The right to reject any and all bids reserved. Before bids are submitted full information concerning the timber, the conditions of sale, and submission of bids should be obtained from the Forest Supervisor, Franklin, North Carolina. S6-2tc-S20

Please read carefully the date shown on the address label of your paper. If you are in arrears, please renew your subscription at once, as postal regulations do not permit the mailing of newspapers if you are not paid up-to-date.

PLANTING BY AIR

Observing nature's method of seeding, by bird and animal droppings, an inventor from California, Dr. Lytle S. Adams, of San Diego, is working out plans for planting by air. Bird droppings have the advantage of surrounding any seeds with fertilizer so that the small seedling when it starts is encouraged and nourished by this fertilizer. This inventor has worked out a method by which a seed is coated with a mud combining nitrogen, phosphorus,

ADMINISTRATRIX NOTICE

Having qualified as administratrix of William D. Parrish, deceased, late of Macon County, N. C., this is to notify all persons having claims against the estate of said deceased to exhibit them to the undersigned on or before the 5th day of September, 1946, or this notice will be plead in bar of their recovery. All persons indebted to said estate will please make immediate settlement.

This 5th day of September, 1945.

and potash. This coating gives a little added weight to the seed and also it gives the seed the right kind of a start. This coating is given by a pellet-making machine which can turn out thirty thousand seed pellets per minute. The seed pellets are than scattered over the land by an airplane and it is claimed that 20,000 acres can be seeded per hour.

Farmers are going to have a choice of many new mechanical devices after the war. Labor saving devices will increase the production per man on the farm. America is already far in the lead over any other nation in the amount of food produced per man on the farm.

From where I sit... by Joe Marsh

Lawn Mowers— Prewar Versus Postwar

Will Curry isn't falling for those pictures of a postwar life of ease. He was sweating over his lawn mower the other day, when somebody shows him pictures of a mower that runs under its own power.

"Shucks," says Will, "I like a lawn mower that gives you some backtalk and exercise. It gets the old blood circulating and works up a wonderful thirst. Then," Will adds with zest, "there's nothing in the whole world that tastes as good as a cheerful glass of beer!"

From where I sit, there's a lot of good sense in what Will says. A little honest effort never hurt anybody. And there should be more to our post-war plans than how to make life comfortable and easy.

Outdoor work—work you do with your hands and your back—ought to be part of everybody's post-war plans. And on a hot day, as Will says, there's always that sparkling glass of beer as a reward!

BUILDERS

Good work, son! Today you're building a make-believe railroad with a toy train and wooden blocks.

Tomorrow you'll help build a new business, a great manufacturing plant, a modern farm... a more prosperous Southland... and a greater America!

That's the kind of future your dad is working for... your dad and all the other 50,000 men and women of the Southern Railway System.

That's why they're working harder than ever before... making every serviceable piece of equipment do more... finding new and better ways to railroad... speeding the movement of fighting men and supplies... helping to hasten the day of final homecoming.

And tomorrow when you put away your playthings, the Southern will be ready to "serve the South" with even greater efficiency and dependability... because of the experience and know-how that come from handling a record wartime transportation load.

Yes, already these "builders" of the Southland, young and old, are hard at work preparing for the days of peace and plenty that lie ahead.

And that's another reason why we are constantly saying, "Look Ahead—Look South!"
