# INTERNATIONAL HARVESTER

*says:*

"Any price is too high if it can be reduced."

**We second the motion We'll do our part!**

International Harvester has reduced prices to save users of its products \$20,000,000 a year. The reductions apply to a selected list of various products made by the Company.

In making its announcement to the general public last week, International Harvester said:

"We believe there is nothing more important to this country than to lower the prices of goods people buy."

"The American people have insisted that the government withdraw from its attempts to control prices in peacetime. That places the responsibility where it belongs—in the hands of business and industry."

"Because we believe price reduction is vital, we are willing to assume the risks involved."

As International Dealers we will do our part. We will pass International Harvester's price reductions to our customers.

And now a word of gratitude to our friends who have patiently waited for the new machines they need. As most of our customers are aware, International Harvester has done everything possible—and some things that seemed impossible—to maintain and increase production.

The outlook is somewhat better. Soon we hope to supply equipment to all of those who have cooperated so faithfully with us.

Meanwhile, the same top-quality International Service and Parts that have kept equipment operating for our customers during the difficult years are available from us. We urge our friends to continue to use these facilities to obtain maximum operating economy.

International Harvester is doing its part with quality, increased production and reduced prices.

We will do our part in this territory
