### Explain Why Water Is Temporarily Cloudy

Commenting on complaints received in the past few days that the town water is cloudy and has a taste and smell, town officials said Thursday that this is not due to chlorine put in the water at the Murphy road filtering operation. The new water mains being installed are sterilized with a heavy solution of chlorine, it was explained, and then flushed out. Apparently the flushing did not eliminate all the sterilizing chlorine, and the remainder is what is affecting the water. It should clear up within a day or two, it was said.

### Auto Drivers' License Tests Being Given Here

begin with the first two letters of the alphabet will be given examinations during this period, except for applicants who never have been issued licenses or who want to duplicate licenses.

A license issued under the new law will be good for four years, expiring on the licensee's fourth birthday anniversary after the date of issuance of the new license.

The examinations, which take about half an hour per applicant, are in four parts: A sign test, a road test, an eye test, and a test of the applicant's knowledge of the laws governing motor vehicle operation.

Mr. and Mrs. Henry Christy have sub-let their home on the Murphy road to Mr. and Mrs. M. Monderer, and Mr. and Mrs. Christy and their family have moved to the Cartoogechay community for the summer.
