MACON HUNTING SEASON TO OPEN SEPTEMBER 15

Dates And Bag Limits Are Announced By Commission

Hunting seasons and bag limits for 1947-48, which are substantially the same as those in effect last year, have been announced by the North Carolina Wildlife Resources Commission. The seasons and limits were set after a public hearing in Raleigh.

Fall hunting will begin in Macon County with the opening of the squirrel season September 15. The daily bag limit for the season, which will end December 15, is five, and the possession limit is 10. However, two fox squirrels may be included in the daily limit.

Macon County is closed to deer hunting this season. In those counties that are open, the season will run from October 6 to January 1. A new regulation added this year states that "deer must have antlers plainly visible."

October 15 will be the opening day for bear hunting and the limits, both seasonal and daily, remain at two. This season, with the same regulations applying, Russian boar hunting will be permitted from October 15 to January 1.

Thanksgiving day, November

27, will be the opening day for quail, rabbits, and ruffed grouse, and January 1 will be closing day for all three sports.

Bag limits on quail are per day, eight; in possession, 16; and season, 150. Rabbit hunters are limited to five per day, ten in possession, but there is no limit for the season. Ruffed grouse limitations are two per day, four in possession, and 10 for the season.

Foxes may be taken with guns during any time at which the

season is open in the county for the taking of game birds and other animals, except in counties having local fox laws. There are no local fox laws in Macon County.

ABOUT FOOD PRICES

(Facts about retail food prices)

YES, food prices are too high. In all the talk about lower prices, let us remember this:

Day in and day out, no retailer does a better job of keeping prices down than a food merchant.

Any good food retailer will tell you that his profits have been slimmer than at any other time in history, on the other hand increased operating costs have cut profits to the bone.

Merchants generally have reduced prices as a plan of good merchandising, but we cannot reduce prices by 10% as was appealed for by President Truman.

To have a substantial and permanent price reduction on food, the retail grocer must first have a reduction on food by the manufacturer and the producer.

Our policy is to sell quality food at the lowest practical price and we will continue to lower prices as fast as reduction in cost to us and economies in our overhead will permit.
