Farms To Load U.S. Uses Oil At Rate 23 Times Rest Of World

The U.S. today consumes 28 times as much oil per person as does the rest of the world, using oil for industry, transportation, the home and the farm. With the close of the heating season, current emphasis is on the farm use as spring plowing begins. Since 1941, the farmer has virtually doubled his use of gasoline for tractors and other equipment and is utilizing Diesel oil, kerosine and bottled gas in increasing quantities.

Demand for farm products probably will not be so strong in 1948 as last year.

Cash receipts of farmers in the first quarter of 1948 were 6.3 billion dollars.

Europe's 1948 wheat and rye crops are expected to be well above those of last year.

REFINERY PEOPLE, like Andrew Gonos, whose skillful operation of complex modern equipment maintains the output of high quality products.

What's behind the "Esso" Sign? . . .

THOUSANDS OF MOTORISTS know the red-white-and-blue ESSO Oval as "The Sign of Happy Motoring." It is their roadside mark of quality in gasoline and motor oil, of fine Atlas Tires and Batteries and other motoring supplies.

But perhaps the most outstanding thing behind the Esso Sign is not just the great laboratories and refineries of Esso Standard Oil . . .

Instead . . . the greatest and most unusual thing behind that familiar sign is probably just the people who work at Esso Standard Oil and the kind of jobs they have!

Workers who have not had an important strike or labor disturbance in over 30 years! . . . Workers who today average over 14 years apiece of service with the company! . . . Workers with regular, paid vacations each year.

Workers with good wage scales and steady work. Workers with retirement income assured for life. Workers with opportunities for advancement, with company training to help them get it! . . .

These and other unusual employee benefits result from Esso Standard Oil policy that was set up many years ago. It is a policy that believes good jobs draw and hold good workers.

And it's a policy that gets worthwhile results for all concerned—including, right now, the greatest production and delivery of petroleum products in our history. The better you live, the more oil you need, and today we and all the oil industry are straining every facility to meet your record needs for gasoline and oil in cars and homes, planes and trains, factories and ships, and on the farm.
