Fishing Excellent On Upper Part Of Nantahala River

Fishing in the Standing Indian Wildlife management area is excellent this season, forest officials say.

It was in this area, located at the head of the Nantahala river, that William Nothstein achieved the ambition of a lifetime when he landed a 23-inch, four-pound Brown trout May 8—believed a record for this section—and other fishermen are catching the limit.

Last Saturday, when fishing conditions were said to have been not the best, most of the 32 fishing in the area caught the legal limit of 10, and one fisherman, using dry flies, caught his limit between 11 a. m. and 3 p. m., all the fish being between nine and 15 inches in length.

Mr. Nothstein's record specimen, caught with a No. 12 wet fly, was presented to the Nantahala National Forest for preservation. Mr. Nothstein is a Forest Service employe here.
