Fence Issue Again Before Town Board

the survey and that he knew where every peg in the line was before he bought any property there.

Mr. Phillips then said that he felt that the street should be rocked as soon as possible. Other board members seemed to feel that several other street jobs should have preference over this one. The discussion came to a close at this point with no action taken.

Mayor T. W. Angel, Jr., read a request from the district health office asking that the town appropriate \$500 for the purpose of helping to continue the health office here and to enable the board to grant modest salary increases to the employees here. This money would be a supplement to \$4,000 appropriated by the county. The mayor said that he was personally opposed to it, that the people of Franklin would be taxed twice if this were done. Board Member Erwin Patton said that he felt that the matter should be taken care of by the county entirely.

The board, upon a request from the Bank of Franklin, authorized the release of the securities in the amount of \$105,000 which had been held to insure deposits of the street water and sewerage improvement funds. Collateral of \$5,000 is still being held to insure the \$3,000 remaining in these funds.

Group From This County Attends Big Barbecue

Thomas H. Johnson, chairman of the Macon County Democratic executive committee, Clerk of the Court J. Clinton Brookshire, Register of Deeds Lake V. Shope, Lester Waldrop, Taylor Crockett, C. Gordon Moore, and Alex Arnold attended the barbecue at Sky Brook farm, in Henderson county, Saturday. The barbecue, which drew Democratic leaders from all over the state, was given by Harry R. Plyford, Sky Brook farm owner.

Plan Demonstration On Sanding Floors

State College Answers Timely Farm Questions

Q. What are some factors to consider in determining the best combination of enterprises on a particular farm?

A. Maintenance of soil fertility, rotation of crops, labor distribution, distribution of income, use of untillable land, use of by-products, spread of risk, efficiency in use of buildings and machinery, capital available, and personal preference.

Q. What are some general farm jobs which should be done in September?

A. Clean and oil machinery that is to be stored. Clean granary and cribs and prepare for storage of corn, soybeans, cowpeas, peanuts, and lespedeza seed. Make the corn crib rat-proof. Make a complete check of the farm and reduce all possible fire hazards. Pay special attention to heating and lighting equipment and fuel

road.  
High score was won by Mrs. James Dance; low score prize went to Miss Julia Ann Higdon; and bingo was awarded to Mrs. Neil Johnston.

The hostess presented Mrs. Manning with a gift.

storage. Arrange for fall supply of fertilizer. Haul out manure on the land to be seeded to small grain. Keep the farm record book up to date.

Q. Is North Carolina producing enough hybrid seed corn to supply its own needs?

A. No, only about one-third enough, according to Dr. R. P. Moore, director of the North Carolina Crop Improvement association at State college. The 3,900 acres planted to founda-

tion seed this year will produce enough certified seed to plant about 30 per cent of the state's corn crop in 1949. The leading hybrid seed varieties being grown are N. C. 27 yellow, produced on 1700 acres, and Dixie 17, produced on 1200 acres.

Q. How can the amount of corn in a crib be estimated?

A. Multiply length by width by height (all in feet) to obtain cubic feet. Divide by 3.5 for corn with husks; 2.5 for

husked ear corn; and 3 to 3.25 for early harvested and husked hybrid ear corn. This gives the number of bushels in the crib.
