

# Highway Fund Adequate To Pay For Ambitious Program

S. Gilmer Sparger, Executive Secretary of the North Carolina Petroleum Industries Committee, said today before a dinner meeting of oil men from Swain, Macon, Haywood and Jackson Counties that available highway revenues are adequate to finance an ambitious road building program over the next three years, if used exclusively for road purposes. The meeting was held at Waynesville.

Mr. Sparger declared, "There will be available during the next three-year period for highway construction, maintenance, debt service and administration, more than \$200,000,000.00. This figure is based on annual receipts from the State gasoline tax of \$41,000,000.00, motor vehicle registration fees of \$16,000,000.00 and Federal Aid of \$11,000,000.00. The only thing necessary is to make sure by appropriate legislation

Linens should be ironed on the wrong side to prevent shine. If a high gloss is desired on your damask cloths, iron first on the wrong side, then on the right. Your linens should not be starched as they have a tendency to remain firm and crisp, but a very light starching is advisable for your cotton or rayon damask cloths.

Starch is removed from iron either with a soft damp cloth and no-abrasive cleaner or with a very fine steel wool which can be purchased in any hardware store. Home economists recommend No. 00

How should rayon be ironed so it won't get that shiney look? Rayons should be rolled in a turkish towel to eliminate excess moisture; then hang them on a hanger until dry enough to iron. Iron on the wrong side with a moderate iron. Remember, water spots rayon so don't let it dry completely and then have to sprinkle it.

Look for the label in clothes. The manufacturer's name or trade mark, address, degree of color fastness, and resistance to

that these revenues are spent exclusively for road purposes. To do otherwise would not only be a travesty on good judgment and sound fiscal policy but a breach of trust with highway users who pay out annually millions of dollars in gasoline taxes and motor vehicle registration fees for better roads and highways."

"The average automotive tax bill," he continued, "amounting to more than \$100.00 per vehicle in North Carolina, is among the highest in the country. In fact, the motor vehicle owners in this State paid more on the average in state gasoline taxes, state motor vehicle fees, federal gasoline taxes and other federal excises during 1946 than all except three other states throughout the nation. As compared with the average for the United States, the North Carolina average is about \$25.00 per vehicle per year higher.

"At the same time," Mr. Sparger concluded, "North Carolina citizens are less able to bear a heavy load of taxation than are citizens of most other states. This is shown by recently-completed Bureau of Census figures which show that North Carolina ranked 41st among the states in per capita income."

shrinkage, special laundry instructions (if any are needed) and fiber contents are the important facts that should be on all informative labels. As soon as consumers demand this information, manufacturers will "see to it" that labels are attached to all their products.
