**MISS ZENA RICKMAN WEDS  
JAMES A. BROGDEN OCT. 10**  
Miss Zena Pearl Rickman, daughter of Mr. and Mrs. T. M. Rickman, of Franklin, Route 4, became the bride of Clarence E. Brogden, son of Mr. and Mrs. James A. Brogden, also of Franklin, Route 4, in a candle-light ceremony on October 10, at the home of the bride's parents.

The Rev. J. G. Benfield, of Lenior, former pastor of the bride, was the officiating minister.

The vows were exchanged before a background of mountain greenery and ferns, floor baskets of white gladiolus and seven branched candelabra holding cathedral tapers.

The bride, who was given in marriage by her father, wore a white wool flannel two-piece dress and a matching halo hat trimmed with white plumes. Her corsage was a white purple throated orchid.

Miss Kate Jacobs, schoolmate of the bride, was maid of honor.

Gardner Holden served as best man to the bridegroom. The ushers were Roy Kicadana, brother of the bride, and Jimmy Brogden, brother of the groom.

Following the ceremony, the couple left by motor on a wedding trip, and upon their return will make their home in Franklin.

**Artificial Breeding  
Subject of Bulletin**

Extension Folder No. 73, entitled "Why Artificial Breeding?" was released by the State College Extension Service this week.

The publication answers 18 questions frequently asked concerning the artificial insemination program.

J. A. Arey and J. F. Brown, Extension dairy specialists who prepared the folder, point out that artificial breeding is not a new discovery. On the contrary, it has been practiced by the Arabs with horses for centuries.

In the United States, the movement started on an organized basis in New Jersey in 1938, and since that time more than 600 artificial breeding associations have been formed in 36 states. Last year more than one million cows were bred artificially.

According to the authors, the main objective of artificial breeding is "to increase the butterfat and milk production of dairy cattle more rapidly, by making the blood of superior sires to more dairymen, especially the small herd owner."

The folder points out, for example, that it is possible by artificial insemination to get 1,000 or more calves from one bull in a year as compared with about 50 by natural breeding.

The publication covers such other questions as conception rates, comparative costs, when to breed cows, and how to calve or breeding service. Copies of the folder are available free from county agents or from the Agricultural Editor, State College, Raleigh.

**The 1949 FRAZER**

*Trailblazer-of cars to come!*

Once in a blue moon the stylists and engineers outdo themselves. They create a car that goes beyond today and sets the pattern for cars of the future.

This is what they have done with the FRAZER for 1949!

Low, sleek and differently handsome it is the trailblazer in style of cars to come. Its exclusive colors and fabrics have made the world's leading fashion designers fall in love with it. They call it "the dream car".

The same car, the FRAZER for 1949, has even won the hard-to-win hearts of the test drivers who must relentlessly punish a car mile after mile for weeks on end. They say the Frazer makes such driving no punishment for them. Its driving ease and riding comfort "make 600 miles a day a breeze," they say.

There's a thrill waiting for you at your dealer's today. With 100 new features, improvements and refinements, the 1949 FRAZER is ahead of its time . . . out front—trailblazing the way for all the cars to come.

First to break clean and scrap tradition, the cars from Willow Run have done it again. Because unlike other "new" cars built since the war, they've road-proved their dependability—2 billion miles worth! Value-proved to a quarter-million justly proud owners. See and drive the new FRAZER now! It's at your dealer's. Kaiser-Frazer Corporation, Willow Run, Michigan.
