1 1/2 Billion Dollar Road Block!

RAILROADS MUST OPERATE around the clock
every day and night of the year.

Although they know this, leaders of 16 rail-
road unions are demanding a five-day, Mon-
day through Friday, week for one million
railroad employes.

They want 48 hours pay for 40 hours work
—in itself a 20% wage increase.

They also demand a minimum of 12 hours
pay for any work performed on Saturdays,
and 16 hours pay for any work performed on
Sundays and holidays.

On top of all this they want an additional
increase of 25c an hour for every employe!

You'd Pay the Bill!

Summing up these demands, they mean that
these union leaders seek to force the railroads
to give one million employes an annual raise
which would average \$1600 per employe!

The total cost of this would be no less than
1 1/2 billion dollars per year, which is more
than twice the expected net income of the
railroads this year.

You'd pay the bill, because if these in-
creased costs are forced on the railroads,

they must have still further rate and fare
increases.

Demands Unreasonable

These employes have had substantial raises
during and since the war. Their average weekly
earnings are higher than the average weekly
earnings of workers in manufacturing indus-
tries. They have more job security than the
average worker in American industry. They
also enjoy paid vacations, a retirement sys-
tem and other advantages more generous
than the average worker receives.

In contrast with the demands of these 16
unions, which add up to the equivalent of 48c an
hour, the Conductors and Trainmen recently
settled their wage request for an increase of 10c
an hour.

Railroads Run for Everybody— Not Employes Alone

The railroad industry must serve not one but
many groups—producers, businessmen, ship-
pers, passengers and the general public—
night and day, every day of the year. These
unions are proceeding in utter disregard of
this important difference between railroads
and other industries. Industrial plants can be
shut down over weekends and holidays, but
freight, mail, express and passengers must
continue to move. *Everybody who enters rail-
road employment knows this.*

Strike Threat

On September 18, 1948, the leaders of these
16 unions began taking a strike vote. *But the
threat of a strike will not alter the opposition of
the railroads to such unreasonable demands!*
