

Man Fined For Keeping Children Out Of School

kept out of school, he said, usually is sickness, and generally to prove illness, a child should be either at home or in the hospital.

Mr. Sumner's school records, presented in court, showed that three of the Beck children, aged seven, nine, and 10, all in the first grade, last year were in school 46, 88, and 42 days, respectively, out of the 180 in the school year; that a fourth, aged 13, in the third grade, attended school 79 days; and that the fifth, aged 14 and in the fourth grade, attended 116 days. The eldest one, despite 64 days' absence, won promotion, he said, adding that the others are bright enough to do their school work if they attended regularly.

A warrant for Mr. Beck's arrest was sworn out by Mrs. Potts, who, in her capacity as superintendent of welfare, is responsible for enforcement of the attendance law. She had announced, late last year, that the law would be strictly enforced after January 1.

When Mr. Beck said that he had taken his children to school and thought they were there, it was explained to him that the law provides, in cases where a parent cannot control his children, that the children may be taken into juvenile court and, if that seems desirable, they may be sent to industrial schools.
