

CULLASAJA PTA INSTALATION CEREMONY HELD

Marks Second Meeting
Of New Association;
Discuss Projects

Officers of the newly organized Cullasaja School Parent-Teacher association were formally installed at a meeting Tuesday night of last week, held at the school.

The officers are Mrs. C. T.

Bryson, president; W. L. Harper, vice-president; Mrs. Helen Higdon, secretary; and George Maloney, treasurer.

Following the devotional, conducted by the Rev. C. E. Murray, Franklin Methodist pastor, the impressive installation ceremony was conducted by Mrs. Weimar Jones, former president of the Franklin association, who also made a brief talk on P. T. A. objectives and possibilities.

The meeting was marked by discussion of projects. On motion of Mr. Harper, seconded by W. C. Clark, Principal W. G. Crawford was authorized, if sufficient funds are available in the association's treasury, to buy suitable blinds or shades for

windows on the south side of the building, to keep the winter sun out of the children's eyes. Mr. Crawford reported he and a committee previously appointed are negotiating for the purchase of playground equipment. Mrs. Bryson, the president, reported a membership of 26, and predicted the figure will be doubled by the next meeting.

Mr. Crawford's eighth grade room won the prize for having the largest number of parents present at the meeting.

Following the program, a social hour was held, when refreshments were served from an attractively decorated tea table. The committee in charge of this phase of the evening's program was made up of Mrs. Lacy Harper, Mrs. Fred Sorrells, Mrs. Fred Henson, Mrs. Rufus B. Price, Mrs. M. Mueller, Mrs. G. Bryson, Mrs. A. G. Cagle, Mrs. Marlin Bryson, and Mrs. Pritchard Russell.

which may eventually make Canada's vast northland self-sustaining in meat production.

The "cattalo," a hybrid of the buffalo and the domestic cow, is hailed as the answer to the problem of finding an animal to stand up against a northern winter. This new crossbreed is said to be adept as the buffalo at foraging for food through

heavy snow and, at the same time is as disease-resistant as ordinary cattle.
