Franklin Gaining

As In Population

During the past decade Franklin has gained in wealth exactly twice as fast as it has in population.

The taxable wealth within the town's corporate limits has more than doubled, figures compiled by Charles O. Ramsey, town clerk, reveal. Property in the town was valued for taxes at \$1,160,664 in 1941, Mr. Ramsey pointed out, while the total this year is \$2,505,590.

The 10-year gain of \$1,344,-946 represents an increase of 116 per cent.

During almost the same period-1940 to 1950-the population increased from 1,247 to 1,975, a gain of 58 per cent.

Appeal Made To Parents For Immunization Of Children

Four cases of dinhtheria were reported in the Cowee community this week, and health department officials issued an apheal to all parents in that community to have their children mmunized against the disease mmediately, either through the ocal health clinic or private physicians.

Diphtheria has already claimed the life of one Macon County child. A 10-year-old in the Tellico community died of the

disease September 25.
Officials said the appeal is not confined to the Cowee community, and urged all parents in the county to take action if their children have not received diphtheria immunizations.

Immunizations of all types are given at the health department clinic in Franklin every Monday. Hours are from 9 a. m. to noon, and from 1 p. m. to 4:30 p. m.

Although diphtheria is one of the most serious childhood dis-eases, Mrs. Frank Shope, public health nurse, said it is also one of the easiest to prevent. Children should begin diph-

theria immunizations at the age Scout Thursday night became of three months, receive a booster shot at 12 months, and another before enteling school, she said.

In connection with the outbreak of diphtheria here, Mrs. Shope offered the following as

general information: "Diphtheria usually starts with a sore throat, chilliness, slight fever, aching, loss of appetite, and sometimes vomiting and headache. Even though the symptoms are mild, a child may be in great danger. If a moth-er notices these symptoms, she should notify the doctor at once, for the diphtheria anti-toxin must be given early to be
