## Students' World News Service Set Up In Atlanta, Ga.

An International News Center designed to provide a medium for the free international exchange of ideas and information between students has been established in Atlanta by the U. S. National Student association.

Primary tasks of a news service furnished by the center are to give students in other countries an objective view of the American way of life, and to better acquaint the students of the United States with the ideas, problems and interests of students in other countries.

A new publication called "Stu-

dent Life" and other newspapers containing news of American students will be sent to foreign countries, printed in their languages. A Spanish edition of "Student Life" has already been printed, and 10,000 copies have been distributed in South America and Central America. Editions also are planned in Germany, French, Italian and other languages.

These editions are to give information about American student activities to students in colleges and universities in other lands; while at the same time information about the students in other countries is sent to American students by press releases to the more than 1,000 U. S. college newspapers.

The Doctors' Choice is America's Choice

Long before Camels' nation-wide lead in popularity grew to many billions, surveys showed that more doctors smoked Camels than any other cigarette. Repeated surveys show the same thing. Change to Camels—the doctors' favorite, America's favorite!
