

**FOR ATHLETE'S FOOT A
HERMATOLYTIC IS A MUST.**
What is a hermatolytic? An agent that
breaks the hardened skin. It then
softens the horny part of the foot
and, exposing more pores to the
air, causes the foot to breathe
freely. It is a hermatolytic of
high quality. It is the best
hermatolytic ever made. Order
today.
CAROLINA PHARMACY

This Week With Macon County Agents

By S. W. MENDENHALL
(County Agent)

A Florida cattle buyer has recently been in Macon County buying springer heifers and cows. This isn't anything new. It has been happening for several years. However, this buyer, as other buyers heretofore, was particularly anxious to get artificial heifers and was paying more for them than heifers bred the conventional way.

This is an opportunity that no farmer in the county owning one or more dairy cows can afford to miss. The market is there for you if you will breed

artificially, grow out big heifers, and breed them artificially so they will freshen in the fall.

George Doster, a dairy farmer in the Clarks Chapel community, has just recently started milking two artificial heifers that are milking around 40 pounds daily. George says that a man with a milk cow, and especially our Grade A dairymen, can not afford to use anything but artificial breeding.

Last year Siler Slagle seeded a field of Atlantic alfalfa. He seeded only 20 pounds per acre but secured an excellent stand. Siler said that you could expect at least 15 per cent more tonnage per acre from this variety over the common variety. Our experiment stations have obtained about the same results. This seed cost a little more, but will be cheaper in the long run.

After talking to several of our farmers and also watching many of our pastures, it has been decided that our seeding rate for orchard grass or fescue should be increased from 12 to 15 pounds. One pound of ladino clover is sufficient. Farmers having one and a half acres of ladino and grass pasture, or its equivalent per animal unit, should report this to the county agent's office so pasture plaques may be awarded. This is a mighty good project for the agricultural committee in the organized communities and will add points in the contest.

Ed Bradley, in the Iotla community, filled his silo this spring with a cereal mixture of wheat, oats, and barley. During the dry weather he was able to maintain his milk flow. He likes this plan mighty well.

Ned Teague, George Doster, Mark Dowdle, and Ed Bradley have installed hay dryers this year and are well pleased with the results obtained. A better quality hay can be cured with

more leaves saved with a greener color and higher feed value.

The farmers who plan to build silos this year should come by the county agent's office to see the brick and metal door jam that can be used to save labor and cost. Every farmer with eight cows or more should have a silo of some type either upright or trench. We will be glad to come to your place to help you as to location, size, and type.

The new 16-6-2 fertilizer is a combination weed control material and plant food.

**MAKE A
DOUBLE-DATE
WITH A "ROCKET 8"!**

We're so sure of Oldsmobile's appeal to men and women alike that we're suggesting you try it together! Come in... see for yourselves how the dashing Super "88" or the Classic Ninety-Eight has everything you both want in your next car. Take a long look at the long, glamorous, graceful sweep of Power Styling. Then get inside... unleash the mighty "Rocket" Engine. You'll glide away quickly and smoothly as "Rocket" power teams with Hydra-Matic Super Drive*.

Enjoy the foam-soft luxury of Custom-Lounge interiors... the road-hugging comfort of the Power-Ride Chassis. Here, too, is safer, easier handling... the effortless control of Power Steering*, the sure-footed stopping action of Power Brakes.* So, be doubly sure... Come in soon for a demonstration drive. Make your double-date with a "Rocket 8".

*Optional at extra cost.
