TALKS ABOUT HANDICAPPED

Rehabilitation Takes Sense As Well As Heart

Intelligent aid to the handicapped pays off to society in dollars and cents. Dr. H. Koeppe-Baker, of the Chicago Medical Center of the University of Illinois, told members of the Franklin Rotary club at the meeting Wednesday evening of last week. To prove the point, he cited figures from North Carolina's vocational rehabilitation work.

Dr. Koeppe-Baker, whose speciality is aid to those with deficiencies, this summer is at Western Carolina College, Cullowhee, working with the handicapped of this area.

The speaker traced the changes in society's attitude toward those with physical, mental, or spiritual handicaps.

First, he said, they were not accepted—outcasts; then Christianity brought love to bear on the situation. But love alone is not enough; in fact, pitying the person with a handicap is about the worst thing that can be done to him. "I often wonder why people seem to think they should use their hearts and not their minds; that God doesn't expect us to use the brains he gave us."

The intelligent attitude, he continued, calls for applying scientific knowledge to the problem. And, until a few years ago, that meant the parents of the handicapped went from specialist to specialist, and ended with a sense of frustration—they still didn't know what to do. But today "team work" has been brought into play, where specialists, including non-medical men, team up to provide aid, so that the handicapped person can live something like a normal life.

Pointing out that there are all sorts of handicaps, of the mind and spirit as well as of

'The Goat Man' Is Passing Through The County

One of the most unusual, and certainly the oddest, attraction rolled into Macon County from Georgia Monday morning. It was "The Goat Man", a bearded character who would be prime material for a Ripley write-up because "The Goat Man" is a hard one to believe. Behind this man lies 80,000 miles of traveling over the country in his nine-goat powered semi-trailer wagon-type caravan, a grotesquely decorated thing with just about everything from old license plates, tires, bottles of many shapes, beer cans, pots and pans, chairs, and even weather vane. This rather unorthodox method of seeing the countryside has been employed by "The Goat Man" (Charles McCartney, of Jeffersonville, Ga.,

Route 2, who claims to be the founder of the "Hog Free Thinking Christian Mission"—he mentioned nothing about the absence of rubbish along the road to decorate his wagons in that length of time. His traveling companions on his mountain trip include 27 goats of assorted varieties and his 17-year-old son, Gene. In an interview Monday at Otto, he said he was bound for Gatlinburg, Tenn., and he plans to hire a truck for the trip over Newfound Gap "to keep them blamed bears from eating up my goats". This goat-means of transportation and iron wheels on the wagons aren't conducive to speedy travel, but he expects to be in the Tennessee city by Saturday.
