### LET US EAT TO "LIVE"—

BETTER HEALTH THROUGH BETTER NUTRITION — Children's attitudes toward food usually follow the example set by their parents. If adults enjoy a variety of foods, children assume the same reaction. The parents' habits, likes and dislikes, become those of the children. Reject one kind of food and the child will do likewise, if for no other reason than the "rejection" makes him feel more grown up.

Knowledge of how to apply science of nutrition to our daily living is important. A well-balanced diet containing a variety of nourishing foods helps make for healthier, happier living.

**BUILD GOOD EATING HABITS** — After good, nourishing food is prepared and attractively served, the final step is a pleasant, congenial atmosphere. The family should come to the table calm and relaxed, happy and cheerful.

Mealtime is a good time to chat with children about play and school. It is a time to discuss things of mutual interest to all members of the family.

to said estate will please make immediate settlement.

This 19 day of February, 1954.

and cob meal plus steamed bone meal and salt should be fed.

Q. How does tobacco blue mold spread?

A. The fungus parasite that causes blue mold produces two types of spores or seed-like bodies. One type has a protective coating that allows it to live over in the soil of the seedbeds where the disease has occurred. It can start the disease the following year if the old bed is used. The other type spore or seed-like body is produced by the moldy growth visible on the underside of diseased leaves. Single spores cannot be seen with the naked eye, but when massed together in countless thousands they can be seen as the moldy, bluish mass known as blue mold. When ripe or mature these spores drift like smoke in air currents to healthy plants nearby or even miles away.

Q. What makes some of my chickens lame?

A. There are several possible reasons for lameness. In some cases it is possible that a collapse of certain nerve centers has occurred, probably related to breeding. Such lameness is not contagious. In very young chickens rickets (improper bone formation) will cause a limp. This condition is dietary and can be quickly corrected. Another cause of lameness is perosis (slipped tendons). Perosis usually appears in birds six weeks of age or older. It is probably caused by a lack of mineral balance in the diet. Then there is leukosis, which is caused by a tiny germ that is transmissible from bird to bird. Affected birds should be destroyed.

Q. How can I cut my dairy production costs?

A. There are many ways, but your best bet right now is to cut down on the protein in the grain feed ration. Now that pastures are growing the protein content in the feed should be cut to 10 per cent. To keep cows from getting thin on pasture a ration of 600 pounds of oats and 400 pounds of corn

## ARTHRITIS?

I have been wonderfully blessed in being restored to active life after being crippled in nearly every joint in my body and with muscular soreness from head to foot. I had Rheumatoid Arthritis and other forms of Rheumatism, hands deformed and my ankles were set.

Limited space prohibits telling you more here but if you will write me I will reply at once and tell you how I received this wonderful relief.

## Henry On Army Duty In Germany In 'Ivy' Group

Pvt. James R. Henry, son of J. R. Henry, of Franklin, is now serving with the 4th Infantry Division in Germany, the Army Home Town News Center announced this week.

The 21-year-old soldier is receiving field training with the "Ivy" division of the 7th Army. He is assigned to the 8th Regiment's Company E and was last stationed at Fort Jackson, S. C., where he received his basic training after entering service in September, 1953.

## Crisps Aboard Rocket Ship

Cullasaja's sailing brothers, Floyd T. and Jesse E. Crisp, are both serving aboard the rocket launching landing ship USS 401, which recently returned to San Diego, Calif., from a tour in the Far East.

The sailors, both seamen, are the sons of Mr. and Mrs. Frank W. Crisp.

While in the Far East, their ship was assigned to the Korean West Coast Escort and Blockade Force, according to the Fleet Home Town News Center, which made the announcement.

## Patton Folk Plan Center Work Day; M. Y. F. Organized

By FRED HANNAH  
(Community Reporter)

The Patton Rural Community Development Organization met in regular session at the Patton church April 6. After a brief business session, it was decided to have a public working to work on the community building, April 24. The women of the community agreed to serve lunch to everyone working.

With the advent of spring, farmers are busily engaged in seeding grass and treating land already seeded with lime and phosphate, according to recommended farm practices. One car load of lime has already been used this spring, making a total of four car loads used by the farmers in this community since the organization of our community development program.

A Methodist Youth Fellowship was organized at the Patton Church Sunday night, April 4, with 10 charter members. The following officers were elected to serve for this year: president, Barbara Talley; vice-president, Susie Mashburn; sec-treas., Carolyn Cochran; pianist, Nancy Cochran; song leader, Carolyn Cochran. Ten Blaine was chosen as adult counsellor and Mrs. Harley Stewart as co-counsellor.

We are indebted to the members of the Clark's Chapel M.Y.F. and their counsellor, Roger Vanhook, in helping us set up our organization.

Six women from our home demonstration club attended the District Federation meeting at Cullowhee April 8. Those attending were Mrs. Sherman Ledford, Mrs. Roscoe Higdon, Mrs. Mack Moffitt, Mrs. Harley Stewart, Mrs. Ted Blaine, and Mrs. Fred Hannah.

At the conclusion of our community meeting, the junior choir sang several selections. Refreshments were served.

Our next regular meeting will be held at the church, May 4.
