PLAN NATURE STUDY SERIES

Children's Classes
Will Get Under
Way Tuesday

Nature study classes for children will be conducted again this summer by the Highlands Biological Station, as a part of its educational program, it has been announced.

The classes will be held each Tuesday and Thursday from 10 to 11 a. m., at the station's Museum of Natural History. The first class was held Tuesday morning.

The series is for children in the 6 to 14-year age group. For children older than 14, or for advanced children of lower age, special projects may be worked out with the curator, it was explained.

Because of the cost of the visual aids used, a charge of 25 cents per admission, or \$3 for season tickets, will be made, except for children of members of the station or children attending the Highlands public schools.

Church

Grounds And Cemetery Landscaped

By MRS. HARDIN GRIBBLE
(Community Reporter)

The Prentiss Rural Community Development Organiza-

tion has cooperated with the "grounds committee" of Union Methodist Church in landscaping the cemetery and church grounds. To those who saw the grounds before the work was done, the improvement is noticeable. Grass grows where rocks and bare earth were;

shrubs at just the right places; thrift and other small flowers—a well thought-out program by people interested in the appearance of their community.

Our eyes turn now toward the picnic area for tourists, which is just below our church. In cooperation with Longview and

West Union, we hope to see results of more good planning here.

Americans consumed an average of about 29 pounds of chicken, 5.3 pounds of turkey, 62 pounds of pork, and 73 pounds of beef during 1953.
