from ALL of our passenger business...

amounted to about ONE THIRD of our total TAX BILL!

WHAT HAPPENED TO ALL these tax dollars? Many of them never got very "far from home". In fact \$14½ million ended up in state, county and local tax treasuries along the lines of the Southern. Here they went to work for your community—helping to pay for schools and their maintenance... police and fire protection... highways and streets... many other vital public services.

As a taxpayer, yourself, it is personally important to you that the railroads contribute, through their tax payments, to the support of your community. It also is important to you that the railroads pay all their own costs of doing business, without help from the taxpayers.

But the railroads cannot forever continue as taxpaying, self-supporting private enterprises if they must forever continue to compete for business with transportation agencies supported in part by your tax dollars, and ours. No industry can!
