

from pins and needles. They are not designed as a pin cushion or needle holder but to run pins and needles through when needed.

Other handy sewing tools are carbon paper and tracing wheel, tailor's chalk, machine seam gauge, zipper and cording foot.

**Children's Socks** — Socks for children should be smooth, well shaped to fit the foot, and reinforced at the toe and heel. Socks should measure one-half inch longer than the child's foot, and it's safer to buy them by measurement than by size.

During the past five years, the \$10,000-and-up income group has grown by 90 per cent. This class, though, represents only 7 per cent of the total number of families in the country.

hold necessary tools and materials. For neatness and convenience, keep smaller tools such as pins, needles, thimbles, etc. in a smaller box inside your larger sewing box or basket.

Along with the usual scissors, needles, thimble, thread, tape measure and pins, put an emery bag in your sewing box. The purpose of the emery bag is to sharpen and remove rust and tarnish

**Your Sewing Tools** — The sewing machine is the most important tool. "The use and care you give your machine," says Mary Lee Lee, extension specialist in clothing at N. C. State College, "will greatly determine the job it will do for you. Keep it well oiled, and only an experienced person should regulate the tension."

Everyone who sews needs a good sturdy sewing box or basket to

**Q. Why do marketing specialists say that the egg outlook is "bright" for this year?**

**A. Lower feed cost compared to past years and a laying flock about equal to 1955 indicate that prices of feed and eggs should be favorable for six or seven months at least, according to the experts.**

**Q. How much and how often should I give salt to my fat cattle?**

**A. Fattening cattle should consume from one-half to one and one-half ounces of salt per head**

daily, depending on the kinds of feed used in the ration and the age of the cattle. It's a mistake to withhold salt from cattle toward the close of the feeding period and salt heavily just before shipping, USDA says.

**Q. Is it safe to graze sudan grass at any time?**

**A. Prussic acid poisoning of livestock may result if sudan grass is grazed after a frost, specialists warn. Sudan and sorghums have prussic acid at certain stages of growth, in the early stages in new growth after frost. Better ask your county agent for details on this.**

**Are All Cold Remedies Alike?**

No! For example, 666 is the wide-activity medicine, which combines 4 of the most effective, widely-prescribed drugs known, to relieve all cold miseries sooner. 666 is more potent and gives positive, dramatic, rapid relief from miseries of all kinds of colds. That's why 666 is unsurpassed in effectiveness. Try it.

No other cold remedy can match 666 liquid or 666 Cold Tablets. **666**

3. What food value do oranges have? Oranges and other citrus fruits are one of our best sources of vitamin C, which helps fight infection in the body. Since the common cold is a form of infection, it is important that this vitamin be included in the diet. Because the body cannot store vitamin C, it is necessary that this nutrient be obtained daily.

4. Can the unused portion of orange juice be stored without losing vitamin C? All three types of orange juice can be stored in a tightly covered container in the refrigerator with little loss of vitamin C.

5. Are oranges with a slight greenish tinge as ripe as fully colored ones? Citrus fruits are required by law to be mature before picking. In some varieties, the orange color develops before the fruit is mature and green color may return after the fruit has reached its prime. If oranges are treated with a harmless dye to give added eye appeal, they must bear a stamp "color added." Size, scars and russet spots do not affect flavor or juiciness.

By MRS. MABEL R. SWAN  
(Assistant Agent)

who hate to squeeze oranges for juice, it's nice to know that frozen orange juice concentrate contains as much nutrient and vitamin C as freshly squeezed oranges at approximately the same cost.

The answers to some often asked questions are given by Dorothy Mulder, extension specialist in consumer marketing:

1. Is it better to buy oranges by the weight or by the dozen? Weight is better index of juice than size — since you get about as much juice from a pound of small oranges as from a pound of larger ones.

2. Which is the best bargain, frozen orange juice concentrate, fresh oranges juiced, or single

**Texas Preacher To Give Alaskan Talks At Church**

Talks on Alaska will be given February 4 and 5 at the Mt. Zion Methodist Church by the Rev. Olin Tunnell, of Dallas, Tex., according to an announcement by the church pastor, the Rev. Bob Goldston.

Mr. Tunnell's program will begin nightly at 7:30. A special program for young people is planned at 3 p. m. Sunday.

During three months in Alaska in 1954, the Texas preacher served as special assistant at Seward, with duties as pastor, chaplain of the Methodist hospital, chaplain of the Methodist tuberculosis sanatorium, and chaplain of the Jessie Lee Home for children. He traveled over the Kenai Peninsula, taking pictures and studying conditions of the section.

Mr. Goldston emphasized that the public is invited to attend and hear Mr. Tunnell.
