

peak of the summer, the secretary of the chamber of commerce, Mrs. Margurite Potts, reports the season "about average".

She said the small resort town has been "packed" since July 1 and is just now beginning to catch its breath again. Mrs. Potts doubts that the town profited very much from

the detour route that has placed most of US 23-441 traffic within its grasp this summer.

Highlands' summer population is made up of those who own homes and is therefore stable, she pointed out.

She estimated that very little of the traffic moving over the detour (NC 106 and US 64) came into Highlands since the junction of the two highways

**CHILDREN NEED COMFORTABLE CLOTHING** — Before making children's clothes at home or buying ready-mades, careful planning is necessary, says Julia McIver, extension specialist in cloth-

ing at N. C. State College. Ease in cut, and comfort in design and fit help children forget themselves at play. Children shouldn't have tight fitting belts, necklines, or sleeves. A child has no waistline, and a sash or belt constantly coming undone is a nuisance to a little boy or girl. Too large garments are as comfortable as too small ones. Clothing that allows for movement and growth, Miss McIver tells us, will have:

Fullness across the shoulders and chest.

Looseness through the waistline.

Ample length in the crotch.

Enough room to allow easy bending and stooping.

Loose necklines, cut low at the front.

Good-sized armholes and sleeves.

Weight of the garment supported from the shoulders.

To allow for growth, look for: Loose armholes and sleeves (preferably the raglan sleeve).

Large hems.

Pleats.

Boy's blouses with extra length to provide for moving down buttons as the boy grows.

Adjustable features such as straps on suspender skirts and straps on coveralls.

Part of the tobacco crop has been lost in the field in some of the eastern counties where burning space was insufficient to take care of current primings, say officials of the North Carolina Crop Reporting Service.

Many home fires are due to overload or short circuits, often between the walls of the home.

Grade A milk purchased from producers in North Carolina during the first six months of 1956 was at a record level compared with the same period for previous years, say members of the North Carolina Milk Commission.

Grade A milk production through June accounts for 43 per cent of total North Carolina production.

Tobacco specialists report that extended dry weather in some Piedmont and mountain counties has reduced prospective yields for both the flue cured and burley crop.

Staff members of the Agricultural Marketing Service announce that fluid milk and cream sales to consumers by North Carolina distributors were up approximately eight per cent over the first six months of 1955 and right at 20 per cent above sales for 1953.

Monthly gains were greatest in May and June, but all six months were above 1954 and 1955 levels. All sales gains were above four per cent.

Q. When and how should roses be planted?

A. Except in the highest elevations of the mountains, fall is the best time for planting roses. However, early spring planting is generally satisfactory. In either case, dig the hole large enough so the roots can be spread out as they would naturally grow. Remove all broken roots. Cut the plant back to five or six inches at time of planting. Mound soil over the stem of the plant and leave it in this position until new shoots start growing in the spring. Then remove the mound of soil. Set plants about 2½ feet apart.

Maybe This Way— Which Way Did Wilson Go?

When Woodrow Wilson came to Horse Cove for a vacation, back in 1879, what route did he take after he and his family party left "the cars" and started on a 15-hour trip by stage?

had homes; left the turnpike at a point about where NC 107 now turns off to go to High Hampton; spent the night either at Russell, a post office of that time, just south of the North Carolina line, or at Whitmire's tavern, just north of the state line; thence to Horse

Mrs. W. N. Cook, of Franklin, who was born and reared in Highlands, suggested this week that the group almost certainly left the train at Walhalla, S. C., (to which a branch railway line ran from Seneca); took the old turnpike that led from Walhalla to Cashiers Valley, where General Wade Hampton and other notables
