

Stoudemire Elected Head Of Carson's '57 Program

By MRS. LEONA W. MOORE
(Community Reporter)

Carson Rural Community Development Organization has elected Harry C. Stoudemire as president for 1957.

Officers elected to serve with him include Weaver Hurst, vice-president, Peggy Dills, junior vice-president, Mrs. Mae Belle Cabe, secretary-treasurer, and Mrs. Leona W. Moore, reporter.

The community election was

held last week as a feature of the regular November meeting. The retiring president, Nelson Waldrop, presided.

Plans were made to meet the area rural contest judges, who will be here this (Thursday) morning at 8 o'clock.

Carson also has voted to enter a float in the Christmas parade the last of the month.

The Boy Scout troop will be reorganized with Thurman Blaine as Scoutmaster and J. D. Gibson

as assistant. The Scouts have been asked to paint all the mail boxes of the community.

At a special planning meeting, followed by a Halloween party on October 31, the community 4-H group was in charge of recreation. Brenda Cunningham is recreation leader.

Cunningham Is Training In Colorado

Pvt. George B. Cunningham, son of Mrs. Leah Hastings, of Dillard, Ga., Route 1, is undergoing 16 weeks of basic training with the 9th Infantry Division at Fort Carson, Colo., the Army Home Town News Center announced this week.

Prior to entering the service he attended Western Carolina College, Cullowhee.

Now is the time to check all grain in storage, warns H. Eldon Scott, extension entomologist at North Carolina State College. If the grain was infested when stored, he says, or if it was put into an infested bin, insect damage should now be apparent. Treatment now will reduce the infestation to a low point and most likely protect the grain until early spring, he adds.

Teachers Attend Workshop; School Activities Listed

By MRS. BETH GUFFEY
(Elementary Supervisor)

On Tuesday and Wednesday afternoons of last week, approximately 125 of Macon County's elementary and high school teachers attend a two-day workshop at East Franklin School.

The workshop was put on under the auspices of the State Department of Public Instruction. Subjects covered included language arts, social studies, and core curriculum. It was arranged to permit each teacher to participate in two of the three discussion groups.

Consultants were Miss Madeline Tripp and Homer Lassiter, of Raleigh, supervisors of education, Miss Beatrice Bland, language consultant for the McKee language books (used in this system), Mrs. Nina Clark, Mrs. Harry Allison, and Sim Wilde, of the Asheville City Schools.

In the two days the visitors were in this county, they took time for classroom visitations; not in each of the 11 schools but in a grade at most of them.

Study Minerals
In a study of the resources of

the state, Harry Moses seventh grade at Iotia School has become interested in minerals found in Macon County. Students have collected and classified stones common to this area. Bobby Dennis and Bill Peyer have collection of mica, rubies, corundum, feldspar, sapphires, kolin, and many others.

Purchases Blinds

The P. T. A. of Cullasaja School has recently purchased venetian blinds for two classrooms. The children there are working on units of work ranging from county, state, and federal government to Alaska and other lands over the sea.

Nantahala Improvements

Several improvements have been made at the Nantahala School this year. Just recently the boys in the vocational training class, under the direction and supervision of Mr. Hall, cut enough locust posts to fence the driveway around the school building to protect the grass.

On Tuesday, Nov. 6, the school acquired an activities bus, which will be used in transporting the basketball teams to games and for other school-sponsored trips. Last Friday students toured the Berkshire Hosiery Plant in Andrews.

Before the opening of school this fall, 100 shelves were installed in the library. The P. T. A. provided the materials and Mr. Hall furnished the labor.

A new school workshop is now under construction.

On election day last week, several of the classes held mock elections and the results were close to the national returns.

The Nantahala Falcons opened the pre-conference basketball season last week with a good start as the girls' team downed the Hiwassee Eagles 52 to 35. The boys also won, 45 to 34.

Dairy Extension Specialist Marvin E. Senger says if progress toward better production is to be made in any herd, the culls must be replaced by animals with the possibility of higher production. This North Carolina State College specialist adds that you should select these herd replacements from the higher producing cows in the herd and from bulls that have demonstrated their ability to improve production. Just replacing "a cow for a cow" generally will not result in increased production, he says.

TO MAINTAIN GOOD FLOOR FINISH—Our research specialists say for the hardest most lustrous and most protective finish on floors (particularly in traffic areas, entrances, and hallways) use two or three thin coats of paste wax. Apply each coat of wax separately, let dry, polish, then repeat the process.

To keep floors in good condition polish frequently between waxings to restore luster and remove scuff marks from the floor. Frequent buffings sometimes do as much good as a new coat of wax.

Floors will not need frequent rewaxings if the floor is polished often. When wax begins to wear thin in traffic areas and the luster is dimmed, apply a new

thin coat of wax to these areas. The paste wax softens and blends in with the old wax and does not build up objectionable layers on the floor.

If traffic areas are taken care of, floors usually need entire re-waxing only two or three times a year. They should be re-waxed before the old layer has completely worn off, to protect the floor surface and keep it in good condition. Allow wax to dry 20 to 30 minutes. Have polisher in position to be used before turning on current. Guide polisher in straight lines (on hardwood, with the grain).

SAINTS — Who are they, and why?

Lots of Saints, according to the Catholics. Saints to whom to pray. Saints after whom churches, colleges, and whatnot are named. Saints with relics to honor. Saints with feast days to celebrate. Saints with pictures, statues, medals and the like. What nonsense!

Lots of heroes in America history. Heroes to emulate. Heroes after whom we name our states, cities, towns and public buildings. Heroes with birthdays to celebrate. Heroes with pictures, statues, U. S. stamps and currency to commemorate their deeds. Is this nonsense too?

Yet the cases are parallel with the one exception that Catholics pray to the saints. We do not pray to pictures or statues, but only to the Saints of which these images remind us. We do not adore the Saints. God Alone, we adore. Jesus Christ is our sole Mediator. But we can ask our friends on earth and God's friends in Heaven to pray for us, which interferes not in the least with the many prayers we say directly to God. In honoring and praising the saints, we please God who has designated many of these heroes of Christianity as His own beloved in Heaven. The Saints are the Masterpieces of God, of whom He is the designer.

If any person thinks that our doctrine of the Communion of Saints is strange, let him remember that more than two-thirds of all Christendom has believed and acted upon this doctrine for 1900 years. Let him remember also that from the first century to the sixteenth, this creed permeated all of Christianity; that it is still in the Apostles' creed. If you would like to know more about the Saints and the part that they play in our life, write to Father Healy, Box 403, Franklin, N. C. and you will receive free of charge, a booklet on this wonderful doctrine.

What puts the Mark of Tomorrow in the new kind of FORD?

Here's what puts the Mark of Tomorrow in the new kind of Ford!

It's the sculptured look. You'll see it the moment you let your eyes wander over this fine car. In a '57 Ford you belong . . . anywhere. It's the long, lean lines. There's a greyhound grace to the new Ford. No useless "fat," no showy "padding." Ford is as trim as a jet fighter. It's the hardtop styling. Fairlane sedans have the hardtop look of Victorias! Superthin center pillars are smartly concealed to give hardtop beauty when doors are closed.

It's the freedom of choice. Colors? Fabrics? Accessories? Far more! Ford gives you a choice of two new, bigger sizes . . . longer, lower, roomier! It's the ride that stays gentle. With a new frame that rides sweeter and lower, new springs, new suspension all around, even the roughest roads can't ruffle the poise of the new Ford.

It's the Thunderbird power. Ford celebrates its Silver Anniversary of V-8 leadership with the biggest selection of V-8's in Ford history.* In addition to all this Thunderbird GO, there's a new and more powerful Mileage Maker Six.

"Six or V-8, the going is great!"

Just looking at this Fairlane Club Sedan is a special kind of fun!

It's the record-breaking performance. On the Salt Flats at Bonneville, Utah, a '57 Ford traveled 50,000 miles in less than 20 days . . . an average speed of 108.16 mph, including all pit stops! Another Ford averaged over 107 mph. Altogether, 458 national and international performance records were smashed as Ford rewrote the record book.

It's the big dollar value that lasts and lasts. Styled for tomorrow, a new Ford keeps its value longer. And wonder of wonders, all this extra strength, extra beauty, extra length is yours at low Ford prices!

*Included is a special 270-hp Thunderbird 312 Super V-8 engine available at extra cost. Also, an extra-high-performance Thunderbird 312 Super V-8 delivering up to 285 hp.

Wise man say:
"Don't wait for TOMORROW when you can get it today!"
