Hints To HOMEMAKERS

Fitting Children's Shoes — It's important to fit shoes correctly—children's even more so than your own for their bones are soft and still growing. Remember, too much shoe space can be just as dangerous as crowded space.

Good fitting shoes need not be expensive. Moderately priced shoes today are serviceable and made of good wearing materials. Lasts and construction are normally the same as those used in higher priced shoes. Because children outgrow rather than outwear shoes, it is better to buy moderately priced shoes and buy them often, thus changing sizes as needed by a child's fast growing foot. Don't buy shoes too large nor at-

tempt to get every last bit of wear from them which is apt to happen when a mother strains her budget to buy her child "the very best".

Quick Breads — By nature of their definition, quick breads are speedy to make. They require no rising periods and usually depend on baking powder or soda for their leavening. They serve as popular treats for the family and friends.

Quick bread mixes are on the market or you may wish to make your own. Homemade mixes are cheaper. Write to S. Virginia Wilson, extension nutritionist at N. C. State College, P. O. Box 5097, Raleigh, if you would like the recipe for homemade mix.

Give your children real security . . .

We don't mean the nicest house in the best neighborhood . . . the newest, sleekest car . . . the right schools, the right camps.

We're talking about the kind of security they can't do without . . . the kind that comes from inside.

Faith. In God, in life, in themselves.

For life is no game for spiritual sissies. Only Faith . . . the armor of the spirit . . . will give them the stamina to meet it courageously, no matter what it brings.

You can show your children where to find faith . . . how to build it day by day, if you make praying a family affair.

Build a stronger, richer life . . . worship together every week
