

Hints To HOMEMAKERS

By MISS RUTH CURRENT
State Home Demonstration Agent

Wash and Wear — Research scientists say many wash and wear garments carry hang tags giving tested care instructions. When none is given, I believe you will find the following information of assistance in obtaining the maximum satisfaction for wash and wear garments:

1. Prior to washing, remove any trim, such as ribbons and bows that may not be washable.
2. Pre-treat any badly soiled areas by thoroughly rubbing them with a paste of synthetic detergent or soap and water.
3. Wash white garments only with other whites.

4. For hand washing use warm water (100 degrees) and synthetic detergent or soap plus softener. Gently squeeze suds through the garment. Rinse thoroughly without wringing and hang on non-staining hanger to drip dry.
5. Many of these garments may be tumble dried at low to medium temperature setting. To avoid wrinkles, remove immediately after drying and hang on a non-staining hanger.
6. When touch-up pressing is desirable, it can be done quickly and easily using a steam iron or dry iron at the low or synthetic setting.

State College Answers Timely Farm Questions

Q. How can I kill honeysuckle in my yard?

A. The best way to control honeysuckle is with 2,4-D. In some cases a second application may be needed for complete control.

Q. How much grain did farmers in North Carolina place under the ASC Loan Program in 1956?

A. Some 3,216 farmers placed 2.5 million bushels of grain from their 1956 crop under loan with their local ASC offices. The total value of all these loans was in excess of \$3.5 million.

Q. How can plum curculio be controlled?

A. This insect can be controlled by spraying thoroughly with lead arsenate and picking up and destroying all wormy, fallen peaches. An easier and more economical control is to use parathion. Tests with parathion show that by using it in a spray program, you can omit picking up the drops. But you should remember that this chemical is highly poisonous, and should not be used unless you read and carefully observe the directions.

Q. How long should I wait before transplanting tobacco on land that has been treated for nematodes?

A. A waiting period of at least two weeks is needed before transplanting. A longer waiting period is desirable—never less than two weeks.

Q. When should pullets be vaccinated?

A. Pullets should be vaccinated between the ages of 10 to 16

weeks. Vaccinate for only one disease at a time.

Q. Why is alfalfa called the "King of the Hay Crops"?

A. It produces more hay per acre than any other crop. It will produce 3 to 4.5 tons of high quality hay per acre each year for several years on many soils in North Carolina. It is a deep rooted perennial legume. It is rather exacting in its requirements for good growth; therefore if you are planning to seed alfalfa you must do the job right or you will be disappointed.

Q. Is tall fescue (Kentucky 31 or Alta) a recommended lawn grass for North Carolina?

A. Yes. Tall fescue comes nearer giving a year round green lawn grass than any other grass. Growth is checked during the hot summer months, but during the fall, winter and spring it is vigorous and cold resistant. You do not have to seed it every year. It makes a coarse textured lawn and spreads very little, growing in tufts; this can be overcome largely by seeding heavily. If cut close and frequently fescue will thin out rapidly. Set the mower at about three inches. Closer clipping at frequent intervals will kill it.

More Jail Work Needed

With the final touches being put on the addition to the jail, the county's board of commissioners was told May 6 there's new work to be done on the building.

Chairman W. E. (Gene) Baldwin told fellow commissioners, John W. Roane and Wiley Brown, that a state jail inspector was here recently and left a recommendation or two behind.

The inspector said two rooms downstairs in the jail, presently not used for detention purposes, should be fixed up to accommodate women and juvenile prisoners (when the juvenile is jailed on a felony charge).

One of the rooms already has a concrete floor but the other would have to have one poured. Iron bars would be installed and toilet facilities put in both rooms. Presently, one of the rooms is used by the jailor's family and another is used as a jail storeroom.

No action was taken by the commissioners. However, if the workmen now finishing the jail addition don't have to go to another job, Mr. Baldwin said they might be hired to renovate the two rooms.

The commissioners received a letter from the State Highway Commission informing them that 0.8 mile of Holland Road had been added to the state system. They referred to the

highway commission, without endorsement, a letter from Mrs. Verna Rush, of Franklin, Route 2, pertaining to opening a section of the old Georgia road through to the new highway.

The jailor's bill of \$206.50 for April was received and approved for payment.

Mr. Baldwin said W. E. Graham and Sons, builders of the new Georgia road, had been given permission to stockpile gravel on a graded area just north of the county home. He said gravel which remained would help make a firm bed and the area could be used for a driver training area by Franklin High School.

Local Lions Attend Meeting Near Bryson

Seven Lions Club members from Franklin attended a zone meeting Thursday night of last week at the Deep Creek camp ground, near Bryson City.

Going from here were Robert J. Korte, B. B. Scott, Mac R. Whitaker, Frank Martin, Edwin P. Healey, T. Y. Angel, and Wayne Faulkner.

Covered Dish Supper To Feature Meeting Of Franklin Group

The North Franklin Neighborhood Club will hold its monthly meeting Saturday at 7 p.m. at the Slagle Memorial Building.

No formal program is planned, according to H. H. Gnuse, Jr., president. Members are to bring covered dishes.

Some 250 Turn Out For Methodist Meal

Attendance at Saturday night's Methodist Macon Circuit Fellowship supper was estimated at 250. The Rev. Frank C. Smathers, of Waynesville, district superintendent, spoke. The Rev. Sherman Beard, assistant circuit pastor, conducted the meeting.

Newspaperman Fills Speaking Engagements

Two out-of-town speaking engagements were filled within the last week by J. P. Brady, news editor of The Press.

Friday night he was the guest speaker and installed officers at the annual banquet of the Commerce (Ga.) Junior Chamber of Commerce. While in Commerce, he was the guest of the Rev. and Mrs. J. Bryan Hatchett, formerly of Franklin.

Tuesday night, Mr. Brady spoke to the Sylva Lions Club on "The Country Newspaper, Heartbeat of the Community".

National Forest Timber For Sale

Sealed bids will be received by the Forest Supervisor, U. S. Forest Service, P. O. Box 731, Asheville, N. C., up to 1:00 p. m., June 17, 1957, and opened immediately thereafter for all the live timber marked or designated for cutting and all the merchantable dead timber on an area embracing about 564 acres on Coweeta and Jones Creeks, tributaries of the Little Tennessee River, Macon County, Nantahala National Forest, N. C., estimated to be 386 MFB, more or less, of hardwood logs. The minimum acceptable bid for Northern Red Oak, Yellow-poplar, Ashe and Black Cherry logs is \$30.00 per MBF; for Black Oak, White Oak, Basswood, Birch and Red Maple logs is \$22.00 per MBF; for Chestnut Oak logs is \$12.00 per MBF; and Scarlet Oak, Black Gum, Buckeye and Beech logs is \$3.00 per MBF. These prices include \$3.25 per MBF for sale area betterment work. \$1,000.00 must be deposited with each bid, to be applied on the purchase price, refunded, or retained as damages, according to conditions of the sale. The right to reject any and all bids is reserved. Before bids are submitted, full information concerning the timber, the sample contract, the conditions of sale, and the submission of bids should be obtained from the Forest Supervisor, U. S. Forest Service, Asheville, N. C., or the District Ranger, U. S. Forest Service, Franklin, N. C.
