

Color Parade Is Starting

North Carolina's autumn foliage parade is marching across the highest mountains of Eastern America.

At altitudes above 3,000 feet, hardwood forests have begun their transition from deep green to multicolor, with maples flashing a forecast of the brilliance which reaches its peak during the middle two weeks of October and continues into November.

Throughout the mountain vacationlands of Western North Carolina, roadsides, golf courses, and hiking trails are bordered with autumn flowers and the

crimson of sourwood, sumac, black gum, and dogwood. Birch and poplar are turning to gold beside streams and meadows.

Color is advancing rapidly on lofty peaks like Mount Mitchell, Grandfather Mountain, Wayah Bald, Mount Pisgah, Roan Mountain, and along high-altitude sections of the Blue Ridge Parkway through the Craggies north of Asheville and the Balsams between the Blue Ridge and Great Smokies Divides. Maples near peak brilliance at Doughton Park and Blowing Rock on the Blue Ridge Parkway around October 1, when yellow birch is spectacular along U.S. 441 in the Great Smoky Mountains National Park.

Within the next few weeks, color now adorning higher sections of the Great Smoky Mountains

National Park, Pisgah and Nantahala National Forests, and the Parkway will brighten and become more general as the foliage parade reaches across the mountain foothills to the Piedmont and Coastal Plain.

Feeder Pig Buying Tips By Specialist

What are feeder pigs worth?

The answer to this question depends on the price of feed grain and market hogs, says Fred Mangum, farm management specialist for the N. C. Agricultural Extension Service.

Before buying feeder pigs this fall, Mr. Mangum suggests you estimate what you can afford to pay in light of expected hog prices.

It will take about nine bushels of corn and 60 pounds of supplement to turn a 60-pound feeder pig into a 200-pound market hog. With corn at \$1.20 per bushel this represents an investment of \$14.28. Other costs amount to about \$2 per hog.

With these expenses and hog selling for \$14 per hundredweight, you can afford to pay no more than \$11.75 per head for feeder pigs.

"Even at this price you will only break even," Mr. Mangum added. "You'll get no return for your labor and management."

Mr. Mangum suggests using this procedure in figuring how much you can afford to pay for feeder pigs at different corn and hog prices.

Your figuring will show, for example, that if market hogs drop to \$12 you can pay no more than \$9.75 per head and break even.

A little figuring before you buy feeder pigs, Mr. Mangum concluded, will go a long way in determining whether or not you make money on hogs.

There's Money In Good Timber

Nearly every acre of timber growing land in North Carolina is capable of producing \$10 worth of timber annually.

That's the opinion of R. S. Douglass, forestry specialist for the N. C. Agricultural Extension Service.

Tar Heel timber land owners are falling way short of \$10 per acre. In 1958 they averaged less than \$4 per acre.

Mr. Douglass attributes this low average to poor management.

"Any farmer who treats his field crops like most timber owners do their woods would soon be out of business," Mr. Douglass said. "This is exactly what has happened to many timber owners. They have mismanaged their woodland right out of the timber producing business."

fresh point of view...from Pontiac!
Another fresh one from Pontiac!
The inspired beauty of perfect proportion!
The precision control of Wide-Track Wheel Design!
The softer ride of supple suspension!
The wide choice of vigorous Tempest V-8 Engines tailored to economy or high performance!

The car craftsmen who developed Wide-Track Wheels, the innovation that brought a new standard of roadability to the American passenger car, present another fresh original for 1960!

With clean, crisp lines they've composed a delightful rightness of form with unity and rhythm.

Into the proved principle of Wide-Track (wheels farther apart for a steadier stance) they've engineered an ingeniously improved suspension system. This combination of a firm foundation and supple suspension gives you flawless control, more skill in the fine art of driving, smooth stability, bump-yielding softness.

The power plant is typically Pontiac. A wide range of restless, ground-gaining power packages to choose from. All are husky V-8's, ranging from the frugal 425E economy engine that prefers regular grade gasoline to the fiery Tempest 425.

Haven't you been an admiring spectator of Pontiacs long enough? Isn't this your year to become a participant in Pontiac pleasure, to move up to Pontiac ownership, where the enjoyment is the fullest, where the point of view is the freshest?

Wide-Track Wheels give you swayless stability, solid comfort. You maneuver with skillful sureness, accurate control. It's the sweetest, most precise, most rewarding driving you've ever felt.
