

WITH THE FARM WOMEN — U. N. Day Observed: Club Discusses Ample Storage

By MAIDRED MORRIS
(Items this week from: Guilford, Caldwell, Wilson, Hoke, Transylvania, and Chowan Counties.)

United Nations Day was observed by the Guilford County Home Demonstration Club women October 24. Tasty, foreign foods were served at the evening meals in many homes. This was a simple,

effective, and delightful way of making the children aware of other lands and customs of other people.

Miss Betty Williams, home economics agent, reports the purpose of the project was to increase information or knowledge to promote better understanding with people of other countries.

Housecleaning Today

Do you have good storage space for cleaning tools and supplies? Home demonstration club women in Caldwell County discussed this problem at recent club meetings.

According to Miss Ainslee Alexander, home economics agent, a well-planned storage closet was shown to the women. A number of cleaning products were displayed and a long handled dust pan and lightweight broom were discussed.

General Landscaping

With fall in the air, plans for landscaping the home grounds go into action. Wilson County home demonstration club women are studying various shrubs so they will be able to recognize the plants.

Mrs. Ona Humphrey, home economics agent, says that a pro-

ject leader report was given at club meetings on using fruit and nut bearing shrubs and trees in the landscaping plan.

Rugs and Carpets

Rug samples were shown to the home demonstration club women in Hoke County recently to demonstrate good and poor quality rugs, different fibers, and blends.

According to Miss Josephine Hall, home economics agent, the women discussed different fibers used for rugs, fiber characteristics, blends, colors, cost, care, and cleaning of rugs and carpets.

Supply Stressed

Mrs. J. D. Baynard, of the Little River Community in Transylvania County, tried another crop this summer to help increase the family income and home food supply.

Mrs. Ruby Corpening, assistant home economics agent, reports that since Mrs. Baynard's straw-

berry crop was low, she decided to try cornfield beans. From one pound of seed, she sold beans, canned, and gave to her neighbors.

Annual Fashion Show

Highlighting the September county council meeting in Chowan County was the annual fashion show. This show is a climax to a year's work in the clothing program.

According to Miss Pauline Calloway, home economics agent, the three top winners were Mrs. McCoy Spivey, Hobbsville; Mrs. Briscoe Perry, Edenton, Route 1; and Mrs. Conroy Perry, Tyner.

DEVOTEES OF fall colors in the mountains are filling restau- pouring over the highways for a glimpse of Mother Nature's art work.

WONDER WHEN the state's airplane is going to start its aerial photo work on the proposed US 64 project between Franklin and Gneiss?

cessing plant or locker plant in your area, take advantage of their facilities for processing and curing.

Follow a recommended curing schedule for curing meat to prevent over salty meats.

When you take hams out of cure, or get them home, be sure to hang the hams in a fairly dry, cool place. Also, be sure to bag those hams by the first of March to prevent insect damage.

Do not over load your home freezer. Do not put in more than 10 per cent of the total capacity of your freezer in any one 24-hour period. If you have a large amount of meat to go into your home freezer, have it quick frozen at your locker plant or processing plant.

If you wish to have your meat processed at a freezer locker plant or processing plant, be sure

to let them know before hand if you are going to kill hogs or cattle so that they can take them in and do a quality job for you. Deliver your animals to the place of

slaughter early in the day so that they can be slaughtered on the same day. Leave cutting and curing instructions at the locker plant before you leave.

Stone Eternal

a fitting tribute to your departed loved ones.

Some Tips On Hog Killing

With the approach of cold weather, farm families throughout North Carolina will be thinking about killing hogs.

Meats specialists at N. C. State College offer a few tips for producing high quality pork at home.

First, get a meat-type hog (one between 200 and 220 pounds that is six months old and has plenty of length and meatiness to it). The meat from these animals will cure easier than joints from larger animals. If these animals are going to be killed late in the evening and allowed to hang over night and chill out before cutting and processing.

Do not get hogs over-excited before killing; this may give the meat poor keeping qualities.

Be sure that hogs are bled properly for better keeping quality. In curing meat at home, if the weather is not satisfactory, the meat may sour or become off-flavor. If you have a meat pro-
