The Franklin Press and The Highlands Maconian

Turkish Education Explained

(EDITOR'S NOTE: The Turkish exchange student at Franklin High continues writing about life in his country.)

By ADEM UNAL

elementary school, a student may go to a secondary school. The sixyear course is split into two periods. The first three years are attended in a middle school. At the end of middle school, there is a gradu tion examination for admission to a high school. There is again a graduation examination at the end of high school.

The vocational education is the same, only this education is five years in two periods, instead of six years as in secondary education

The school year begins after the middle of September and ends about the first week in June. It is divided into two administrative sessions with 32 hours of work each week.

The curriculum in middle school consists mainly of Turkish history, geography, civics, current events, mathematics, physics, chemistry, a foreign language, art, nature study, music, physical education, home economics, handicrafts (elective for girls) or agriculture (elective for boys). In high school, philosophy, psychology, military science, advance geometry, algebra, trigonometry, composition, geology, astronomy, logic, and seciology are added.

In 1955 and 1956 six high schools were opened where all subjects, apart from Turkish and so- in Turkey in my next writing.

Economists Give Livestock Poultry Outlook For 1961

"Greater numbers of livestock spring crop, acourding to the and poultry during the next 12 months will have an abundant supply of feed grains and a close balance of high protein feeds."

So states the Feed Survey Committee of the American Feed Manufacturers Association, which is composed of 24 'college and experiment station men, represent After studying for five years in ing all areas of the United States. The 1961 spring crop will be

10 per cent larger than the 1960 cial science, are taught entirely in English. In this way, it is expected that when students are graduated they will all be proficiently bi-lingual. The government had long sought to put such

schools in operation and if the experiment is successful as it is expected to be, other foreign language schools might be opened. It is true that, after this attention. many schools were opened, over and over, in which the subjects

are in English. In the schools, grades and promotions are decided by periodic tests and yearly final examina tions. We may go to the university after a comprehensive baccalaureate examination for university en-

trance. During the first year in the life of the republic-1923-there were a combined staff of 1,300 teach- total of 373,000,000. ers and an enrollment of 7,000 students. Today, there are 550 middle for the calendar year 1961 will teachers, and about 200.000 students. About 20,000 are graduated each year from the middle schools

and 8,000 from the high schools. I'll tell about higher education

committee. Beef cattle numbers are expected to be up 4 per cent during 1961. Increases of 7 per cent are anticipated in both turkeys and broilers. Numbers of layers may be down 4 per cent. However, relatively little change is expected in production of dairy and sheep and lambs. The calculated feed balance for the year ahead indicates high pro-

tein feed use to be within 1 per cent of estimated supplies and an excess of grain supplies by more than 50 per cent. It's anticipated that total of 131 million tons of feed will be used.

The 1960 fall pig crop is estimated to be 41,500,000 head, which is 4 per cent less than the pig crop of the preceding fall. It is estimated that aproximate ly 54,000,000 pigs will be produced in the spring of 1961, which is 10 per cent more than in the spring of 1960.

The average number of layers for the feed year beginning October 1, 1960, will be aproximately 285.000.000, which is a 4 per cent decrease from the previous year. This decline is expected, due to the small number of replacement pullets raised during 1960.

for replacement purposes during 72 middle schools and 23 high the calendar year 1961 is expected schools in the entire country with to increase by 10 per cent for a

Commercial broiler production schools, 102 high schools, 8,403 | total 1,925,000,000. This is an inlight breeds. crease of 7 per cent over 1960. It is predicted that 88,000,000 turkeys will be raised during 1961, 400,000. The down-trend in cow yield per cow. which represents a 7 per cent in-

to be slaughtered in 1961, around fice manager of the local A.S.C. 14 million head will be grain fed steers and heifers.

The total number of sheep and lambs is expected to increase between 1 and 2 per cent. Generally favorable feed supply conditions throughout the country should result in some improvement in percentage of lambs raised and put on feed.

Near-record production of grains and cilseeds in 1960 plus record large stocks of corn and sorghum grain provide plentiful supplies of feed for 1960-61.

The 193 million tons of grains, oilseed meals and other concentrates for feed in the current year compare with about 150 million tons fed last year. As in recent years, grain supplies are relatively more plentiful than the highprotein feeds.

A.S.C. News

Signed Up? Sixty-two per cent of Macon County's farmers are participat-ing in the 1960 A.C.P. according to Mrs. Mildred Williams n. of hausted.

office. She says the office is still

interested in getting the 38 per cent remaining interested in carrying out a conservation practice this fall. A total of seven different practices were available in the spring, but the number available now is three. (1) Lime, it may be used now on pastures and meadows already established or on land to be seeded next year;

(2) Fertilizer for improving pastures and meadows; (3) Rye for a winter crop. November 10 is the latest date the office will give orders on rye.

The Macon County A.C.P. development group met Tuesday to make plans for the development of the 1961 A.C.P. for Macon. Participating in this were Siler Sla gle, Harley Stewart, and Frank Gibson, A.S.C. committeemen, Jeff Enloe, A.S.C. fieldman, T. H. Fagg, county agricultural agent, W. L. Harper, S.C.S. technician, and Bob Bryson, county forest ranger. They recomended that the 1961 program be the same as the 1960 with no changes in practices. The 1961 program wil be started as soon as the 1960 funds are ex
