Long Leaf Heart Pine Framing in Long Sizes

SUPERIOR QUALITY OF FINISHING LUMBER

At the Southern Pines Warehouses

SOUTHERN PINES, N. C.

Every builder knows the difference between heart pine long leaf framing and the ordinary old pine stuff. The cost is not much greater, but the durability is worth many times more than the cost.

We have arranged with one of the biggest and best mills in the South to supply the highest grades of the best finished flooring, ceiling, and other types of finishing lumber made. Long leaf stuff, properly sawed and worked, and suitable for the highest class of work. A little higher than the ordinary stuff, but not much, and worth many times more.

Editor of The Pilot, Vass, N. C.
Dear Sir:—It is now months before our county opens, and if you will give space in your paper, for some facts about the Life School which should be of interest to the citizens of adjacent counties.

The Farm Life School opened in 1915 for the purpose of training Moore county boys and girls in close touch with the practical life of a credited high school, and a special training which is of great value in the development of rural citizenship.

When the doors of the school first opened both the boys' and girls' dormitories were filled. In recent years, due to a decrease in the number of high schools in the county, the department has not been so full. However, it is our belief that there is a large number of boys and girls in Moore County who have completed the seventh grade but who do not have a convenient school to attend. It is for these that our school was founded. This group which we serve during the coming year will be the first to enter the Farm Life School.

The Farm Life School is a high school, with well equipped departments of Agriculture, Economics and Music. The girls' dormitories are modern and comfortable.

It is the aim of the school that of a well rounded education, and to maintain a daily routine of work, and to create a sense of responsibility. No servants are expected to willing part of the necessary work. It is expected to reduce the cost of section, and, second, in order to do by doing. Every boy and girl is required to do a share of out-door labor.

During the past year rolled pupils from Richmond, Davidson, Guilford, Chatham and other counties, and one from Georgia, and one from South Carolina. During the past two years we have served thirty-two pupils from Moore county.

Of course we were not able to accept these pupils, but since the school was founded for Moore county girls, it is our hope that it will be able to render all the service possible.

Our rates are as reasonable as possible. Fifteen dollars covers room, lights, food, and tuition. These rates do not turn down who because they haven't the means to attend. Through the generosity of many friends of the school we are able to offer aid to those boys and girls who are unable to pay for their education. These loans are interest free for two years, and four percent is charged thereafter.

The superintendent of the school or confer with me by letter. We have a faculty for the coming year. We will go to any ends to secure the best of whom the school was founded.

Very truly yours,
RICHARD G. H. SULLIVAN

YESTERDAY

Yesterday our sky was dim, flickering rays of light.

Today we are promised the product of Science.

Yesterday thought seemed to be the only thing that seemed to be real.

Today thousands of men yield readily to the temptation of removing the cause of their trouble.

Yesterday, the trouble was without making any effort.

Today the Science of the matter is given the opportunity to solve this task.

If anything goes wrong in your town the TROUBLE is sent for. He locates the trouble and the tractor is your Hero. He, too, will live in the presence of the people.

Live in the presence of the people.
