MCLEAN MAKES SPECIFIC PLEDGES

Leaves Platform Building to State Convention, Saying He Will Stand on Party Plank

and sane yet thoroughly administra- with all the power and influence at tion," Angus Wilton McLean, in a statement issued Monday setting forth his views on matters of public policy, mind as the ultimate goal that equal went strong for the program of prog- opportunity shall be given to every ress, business efficiency and economy child to enjoy the best educational adin government, agricultural development, law enforcement and reform for the judicial system. His statement tural industry, so as to produce prosfollows:

Carolina:

I submit the following statement with respect to my candidacy for the Democratic nomination for Governor of North Carolina:

I shall seek the nomination in the primary on June 7th at the hands of the Democratic voters, and if nominated I will stand on the platform of the party as adopted by the Convention to be held on April 17th. I shall not attempt in advance of the Convention to adopt a platform of my own. I deem it proper, however, that I should at this time declare my personal views with respect to some of the matters of State policy in which our people are interested.

Let me say at the outset in all sinthat it is the highest position of hon-

tions and other branches is to be managed wisely and efficiently and at the same time for the common good. In my judgment, a safe and sane, vet thoroughly progressive business ad-ministration of the State's affairs is the paramount need at the present time. It is my ambition to give the State such an administration.

It is manifestly impossible to refer here to every matter of public concern. I may, however, mention the Aspiring to give the state "a safe. following policies which, if elected Governor, I shall endeavor to support

my command: Continued improvement in our system of public education, keeping in al, that the State can afford. 2. The development of our agricul-

perity and contentment among our To the Democratic Voters of North farmers is at this moment our most should take pride in. pressing problem. Among the things which may contribute to the solution

of this problem are: (a) fostering means whereby worthy tenants may become land owners; (b) establishing York: the Strand, the Rivoli, the Ri- March 27th. a research laboratory in the cotton alto and the Capitol theatres have had sections of the State for experimental work in boll weevil control; (c) providing a more comprehensive system of agricultural training in the rural threatened to result in legal proceedschools and making these schools the ings, but the plum was finally awardcenters of activity for rural betterment.

Taxes and Economy in Government 3. Taxes on both land and personal in the Sandhills.

property are too high in many of the counties and municipalities of the State. There is admittedly a lack of uniformity in the valuation of lands cerity, that I feel a very unaffected for taxation, and this imposes an un- ter ever since the reign of King the fact that it does conform to my sense of responsibility in aspiring to upon individual taxpayors. PEACH PROSPECTS STILL LOOK GOOD

Big Crop Indicated With Lots of Soft Peaches for all of the Neighborhood

While this has been a rather eccentric winter, the peach man has not been sitting up nights shedding tears. April is almost at hand and peach buds have scarcely begun to show colobliged to sign a contract to charge lor. From the first of January up to the present time no excessively cold weather has been experienced, but on the other hand, the average tempera-"Of one thing our patrons may be ture for the three months has been start vegetation have been extremely few. The winter has been a good one on the whole, with just two or three little dashes of snow and a fair amount of sunshine. As a result the orchards appear to be in the best possible shape. Unless unusual conditions should prevail between now and Easter everything points to the biggest yield to the tree that this peach belt has known. Spraying and pruning are well up. The trees appear to have wintered well. Already the railroads are arranging their plans for moving an extraordinary crop, and as soon as the blossoms open the peach men will be dancing until the last shipment goes to market in August.

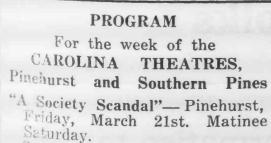

Unless all signs fail, the orchard season this year will be one in which everybody who is willing to work can find a job. The truth is that right there is one of the problems fruit men will have to struggle with. Pickers, packers, trucks and drivers, railroad hands, loaders at the station and evthings aside, strive earnestly and and personal property are assessed quarter has been a synonym style and son from such a crop. Besides these erybody who can do anything will be needed. Many people will come from advantages Moore county and the secother places, for if everything goes tion around Vass have shipping facilright, it is possible that a million crates of fruit or more will be harvestcantaloupe superior in quality to any ed and shipped from this section. While soft peaches and culls are never cantaloupe in the world. These facts spoken of as a great product, anybody who has kept up with peach production knows that a fair percentage of and other advantages to get profitable the fruit is rejected under the rigid returns from their lbor. Sandhill inspection. Beyond a doubt McKeithen & Co., are considering thousands of bushels will be set aside handling seed, fertilizer and crates, out of this enormous crop and people and will also investigate shipping in will come in here in all directions with iced cars to the proper markets. Call cars and trucks to secure the soft fruit in and talk it over with Mr. McKeithat a price that will be an attraction. As the orchards will be busy with their marketable fruit they devote little attention to the grades that will not permit shipment. This gives the RIGHTS people within a hundred miles of the peach belt a chance to get fruit of excellent quality for home use almost at Chancellor McCormick, of Uni- their own prices. This opportunity has been pretty generally understood but with a large crop this year the grades that will be set aside will include so much more fruit than ever before that everybody who can get around and secure some of it will find nent theme. This was Chancellor S. a profitable bargain. Some of the most excellent fruit Prince George, gives a performance Pittsburgh. continuous control of the State for twenty -three years. During all that period its record of useful and progressive achievement has been unparalleled in the history of government. We must remember, however, that progress in government, as in all other human activities, is the result of constant striving for better things, and that perfect accomplishment is always in the future.

North Carolina has entered upon a new era, and it is with pardonable pride that we view her present position among the states. The program of constructive achievement entered upon a few years ago has necessitated not only great expansion in the machinery of government, but also has largely increased our governmental activities to meet the new and constantly increasing demands for a greater measure of service to the people. A mental review of what is us- banking resources. ually termed the State will disclose a great business as well as a great civic organization.
