

PINEBLUFF

At the Baptist church September 20th: Sabbath school at the Ives cottage at 9:45 a. m. Preaching service by Rev. J. M. Arnette at 6:30 p. m. Prayer meeting at 7:30 a. m. at the Ives residence.

At the M. E. church September 20: Sabbath school at 9:45 a. m. Preaching by Rev. R. P. Gibson at 11 a. m. Praise service at 7:30 p. m. Prayer meeting on Thursday evening at 7:30 p. m.

Rev. J. M. Arnette will preach for the Baptist every Sunday evening at 6:30 p. m.

Rev. R. P. Gibson will supply the Methodist pulpit until further notice.

Rev. and Mrs. Gibson returned last week from a six weeks sojourn at Old Fort, in "The Land of the Sky," where he preached to the Baptist and Presbyterian congregations, and enjoyed the beautiful scenery and climate.

Word has been received that Rev. G. S. Parker is gaining and will be able to return to his home here in a few weeks.

Mr. and Mrs. Fred Ladd of Earls-ville, N. Y., and Mr. and Mrs. Fred Southworth of Mount Rose, Pa., arrived in town by auto, September 15, where they will call on friends and pass on to Florida, where they have three houses engaged to build in St. Petersburg.

Mrs. T. C. Fugate and sons, Stephen and Robert, arrived at the home of her father, Rev. R. P. Gibson, Tuesday morning. They have spent a delightful summer at Ocean Beach, Long Island, N. Y.

The school busses are making regular trips to the Aberdeen school, and they are very much over-crowded, and much complaint is expressed.

Mrs. Vance Adams, who has spent some time visiting her old home, has returned.

The gravel has arrived and work has begun on the foundation of the Baptist church.

Mrs. Gunter has the old Tavern full of boarders, and the work on the new hotel is progressing fast. Five more new carpenters arrived to-day, Sept. 15, and they are rooming at Miss Kittell's and boarding at Mrs. Gunter's. Born to Mr. and Mrs. Howie, a baby girl.

Little Hazel Smith was bitten by a rattlesnake one day last week while in the cotton field, she is improving at the home of her grand parents, Mr. and Mrs. Charles Zirkels.

Little Miss Louise Lampley visited her aunt, Mrs. Homer Gibson last week-end and attended the Baptist Sabbath school, also little Miss Emma Neiderer of Newark, N. J.

Mrs. Homer Gibson has returned home after spending three days with

her sister, Mrs. C. C. Lampley at Rockingham, N. C.

Pinebluff is trimming up her sidewalks and parkways, getting ready for the tourist that are to arrive soon. October first brings many people Southward, lured by the sand and sunshine, the pines and songbirds, an abundance of excellent water and our mild climate are a joy and blessing to our Northern brethren of a more rigorous clime.

"And he shall be like a tree planted by the rivers of water, that bringeth forth his fruit in his season; his leaf also shall not wither: and whatsoever he doeth shall prosper.

"The ungodly are not so: but are like the chaff which the wind driveth away."—Psalm 1:3-4.

HOW TO INOCULATE LEGUME SEEDS

"It is well known that legumes are dependent on certain soil bacteria to help them gather nitrogen from the air," says E. C. Blair extension agronomist at State College, "and that it is usually necessary to supply these bacteria when growing a legume on a field for the first time. The last is especially true of vetch and crimson clover in the Coastal Plain."

According to Mr. Blair the seed may be inoculated with the proper bacteria by means of a commercial culture, or, soil from a spot where the legume crop has recently grown may be used with excellent results.

"If soil is used," says Mr. Blair, "scrape off about an inch of the top, and take what is needed from the next two or three inches. Apply about 300 pounds per acre with a grain drill, like fertilizer, having already mixed the seed with it. Where no grain drill is available, sow the seed and soil mixture by hand and disc in at once.

"An easier method and one that requires less soil is to moisten the seed with glue and water, molasses and water, or plain molasses, using just enough to coat every seed. Then mix one or two quarts of soil with each bushel, or roll the seed in soil. Enough

soil for inoculation will stick to the seed."

It is best to sow inoculated seed in cloudy weather, or at least, when the sun is low, states Mr. Blair, as direct sunlight, or close contact with fertilizers will kill the bacteria. If fertilizer is used, work it into the soil be-

fore the seed are sown.

Soil from a field of red, white, or alsike clover will inoculate for crimson clover. English peas (May peas) or wild vetch will furnish inoculation for all the cultivated vetches.

One farmer in Beaufort County

dusted his cotton and now averages 20 grown bolls to the plant. On his undusted cotton, he has only four to five grown bolls to the plant.

Pick your best exhibit at your community or county fair for display at the State Fair.
