Aberdeen Tobacco Market

Our tobacco market opened Tuesday, with a sale of about 60,000 pounds. Many averaged over \$35.00, while a few ran close to \$45.00. Prospects for a big sale at Aberdeen this year are very bright. Our facilities for handling are unexcelled, roads leading to Aberdeen from most directions are all that can be desired, and we have a full corps of buyers and managers who will see to it that the high dollar is paid for your crop.

GET PEACH BORERS SOON AS POSSIBLE

"Now Is The Time To Begin Fight On This Pest," Says County Agent

By E. H. GARRISON

Around October 1 to 15 is a mighty good time to begin application of Paracide around the roots of peach trees to get rid of the borers. Eggs of the borer are usually hatched by this date and this is about the only time that good control can be effected.

Trees six years old should have about an ounce of Paracide applied around them. Trees five years old should have about three fourths of an ounce. This may be left from four to six weeks around the tree. Trees three to four years old, one half ounce left around the tree for about three weeks. Trees two years old, three-eighths of an ounce left for about three weeks.

To apply Paracide, level the ground around the roots of the tree and pour the material in a bowl about an inch from the trunk of the tree. Mound the dirt around the roots of the tree about six inches high and pack it firmly.

Anyone desiring assistance in this work will be given all the help possible.

Forty-seven farmers of Pasquotank County recently ordered 483 bushels of Abruzzi rye for planting this fall.

Cotton at twenty cents per pound will not pay for the present standards of living on a majority of farms in North Carolina.
