Summer Cottages

*built this way are
cool and comfortable*

In no other way can so much comfort be built into a summer home for so little money as with Celotex Insulating Lumber.

This remarkable lumber, made from the long, tough fibres of cane, does what no ordinary building materials can do. It practically stops heat. It shuts out wind and moisture.

The comfortable coolness of a cottage built with Celotex is a delightful surprise. And if you want to use your cottage late in the season, Celotex will keep it snug and warm.

The cost of such a cottage is no more than the cost of one built with good lumber. Celotex is used for both exterior and interior finish. When painted, it will resist the weather quite as well as wood lumber. And it is much stronger in wall sections than wood. The broad, strong Celotex boards are easy to handle and apply. Sawed and nailed as wood lumber.

We sell and recommend Celotex. Ask us for sample and prices.
